**Human Thought and Social Organization** Murray J. Leaf, Dwight Read, 2012-06-07 Human beings have two outstanding characteristics compared to all other species the apparently enormous elaboration of our thought through language and symbolism and the elaboration of our forms of social organization The view taken in *Human Thought and Social Organization* Anthropology on a New Plane is that these are intimately interconnected To understand this connection the book compares the structure of the systems of thought that organizations are built upon with the organizational basis of human thinking as such An experimental method is used leading to a new science of the structure of human social organizations in two senses First it gives rise to a new kind of ethnology that has the combination of empirical solidity and formal analytical rigor associated with the paradigmatic sciences Second it makes evident that social organizations have distinctive properties and require distinctive explanations of a sort that cannot be reduced to the explanations drawn from or grounded in these other sciences Human social organizations are created by people using systems of ideas with very specific logical properties This book describes what these idea systems are with an unbroken chain of analysis that begins with field elicitation and continues by working out their most fundamental logico mathematical generative elements This enables us to see precisely how these idea systems are used to generate organizations that give pattern to ongoing behavior The book shows how organizations are objectified by community members through symbolic representations that provide them with shared conceptions of organizations roles or relations that they see each other as participating in The case for this constructive process being pan Homo sapiens is described spanning all human communities from the Upper Paleolithic to today and from the most seemingly primitive Australian tribes to modern day America and India While focusing primarily on kinship *Human Thought and Social Organization* shows how the analysis applies with equal precision to other social areas ranging from farming to political factionalism      **Encyclopedia of Sex and Gender** Carol R. Gendering Modern Jewish Thought Andrea Dara Cooper,2021-11-02 The idea of brotherhood has been an important philosophical concept for understanding community equality and justice In Gendering Modern Jewish Thought Andrea Dara Cooper offers a gendered reading that challenges the key figures of the all male fraternity of twentieth century Jewish philosophy to open up to the feminine Cooper offers a feminist lens which when applied to thinkers such as Franz Rosenzweig and Emmanuel Levinas reveals new ways of illuminating questions of relational ethics embodiment politics and positionality She shows that patriarchal kinship as models of erotic love brotherhood and paternity are not accidental in Jewish philosophy but serve as norms that have excluded women and non normative individuals Gendering Modern Jewish Thought suggests these fraternal models do real damage and must be brought to account in more broadly humanistic frameworks For Cooper a more responsible and ethical reading of Jewish philosophy comes forward when it is opened to the voices of mothers sisters and daughters
