Management by Process John Jeston, Johan Nelis, 2008-09-10 Business Processes are one of the critical drivers for any organisation in realizing their organizational strategic objectives. This means that management must constantly review and realign organizational processes to reflect the massively unfixed nature of business demands such as changing market circumstances, the changing demands of new customer and existing customers, new products and pricing changes in strategy, and linking processes to new partners and suppliers. Establishing and maintaining a process-focused organization is critical as organizations are pressured to keep achieving further growth and profitability preferably in double digits whilst the avenues available for achieving this growth are getting more and more restricted due to legislation, global competition, and

saturation in the market place This highly accessible book provides a clear and thorough exposition of the six key dimensions necessary for the creation of a process focused organization process governance strategic alignment methods execution implementation people culture technology Each of these critical Dimensions are given a systematic and revealing treatment examining each Dimension in terms of Importance Key trends in this area Elements that comprise the dimension Detailed description of the elements that comprise the ideal or visionary position Road map of how to get there from various starting positions *The Hoosier Farmer* ,1925
