Women in Action Sport Cultures Holly Thorpe, Rebecca Olive, 2016-11-09 Young white men have dominated action sports for many years yet women have refused to accept positions on the margins of these unique sporting cultures. Developing in a different context to many traditional sports, girls and women have adopted highly proactive approaches and developed unique strategies to negotiate space alongside their male peers in the waves, skate parks and cityscapes on mountains and climbing walls along trails as well as around rinks. This international collection features contributions from a group of leading and emerging researchers, many of whom are passionate action sport participants themselves. With authors representing a range of theoretical and disciplinary perspectives including cultural studies, sociology, performance studies, media studies, sport for development and education, this book offers the first collective focus on women in action sports cultures in the past, present and into the future. Ultimately, the book offers a vivid and powerful illustration of the new and ongoing struggles facing women in contemporary sporting cultures as well as the various strands of activism, agency and politics being performed in the surf, on the slopes and at the crag. The book will be of interest to students and scholars in the fields of sociology of sport and physical culture, gender studies, youth cultures, sport history and pedagogy and education. *Schools and Informal Learning in a Knowledge-Based World*

Javier Calvo de Mora, Kerry J. Kennedy, 2019-09-19 This book has two purposes. To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning. Successive chapters explore what is often seen as a duality between informal and formal learning. This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines. Recognizing the contribution informal learning can make to young people's understanding and development does not negate the importance of valued social knowledge that complements it. Students come to school with knowledge learnt from their families, peers, the community and both traditional and social media. They should not have to unlearn this in order to enter the world of formal learning. Rather, students' different learning worlds should be integrated so that each informs the other. In a knowledge-based society, all learning needs to be valued. Some contributors to this book reflect on how new educational systems could be created in a move away from top-down, authoritarian and bureaucratic management. Such open systems are seen to be more welcoming in acknowledging the importance of informal learning. Others provide practical examples of how informal learning is currently recognized. Some attention is also paid to the evaluation of informal learning. A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge-based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments.

Transnational Mobilities in Action Sport Cultures H. Thorpe, 2014-05-30 This book contributes to recent debates in transnationalism, mobilities and migration studies by offering the first in-depth sociological examination of the global

phenomenon of action sports and the transnational networks and connections being established within and across local contexts around the world *Embodiment, Ego-Space, and Action* Roberta L. Klatzky, Brian MacWhinney, Marlene Behrmann, 2008-06-20 The majority of research on human perception and action examines sensors and effectors in relative isolation What is less often considered in these research domains is that humans interact with a perceived world in which they themselves are part of the perceptual representation as are the positions and actions potential or ongoing of other acti
