Friend

Permit me to express these few lines in congratulation of your late success against the troops of a Giant Diabolic, as we have just had the agreeable news by post of the arrival of a Packet at R. Hall's in this Kingdom, whereby we have seen have some good & successful their scheme against the Southern Colonies. I have taken the liberty of sending you a pair of shoulder knots & a sword knot, also a Fan & a dog's hair Bow for your Lady, which with my best respects must beg you both to accept of. I likewise send three other pair Shoulder knots & two sword knots, which leave at your disposal to such Officers you think proper.

Wishing the success hitherto attending your arms may by the assistance of Providence continue, & shortly accomplish the obvious Task you are undertaking. I wish once more to the improvements of some little tranquillity which you have so long been deprived of for our pure & noble motives of having a Purer Country free of ignominious bands of Slavery, which that you may accomplish is one well covered with - Give the Author to be with profound respects,

Yours sincerely R. G. 1778

Wiberg, I.D. Petersen, P. Smoker, 2013-10-22 Since the dramatic end of the Pacific War in 1945 the threat of nuclear war has exercised the minds of many Initial fears concerned the risk that a political crisis between the Superpowers would escalate through military confrontation into a calculated nuclear war Another scenario pictured a new Hitler commanding a nuclear capable state prepared to use such weapons irrationally possibly sparking a catalytic nuclear war between the major Powers More recently attention has shifted towards the risk of the accidental release of nuclear weapons While the risk of intentional conflict between the major Powers has lessened the arsenals have only been marginally reduced leaving the possibility of accidental release as perhaps the most threatening case Inadvertent Nuclear War presents the risk in terms of the reliability and instability of the human and technical systems governing release with contributions ranging from the engineering of computer software to the psychology of the chain of command As Dr Wiberg states in his introduction No known technical construction human being or social organization is absolutely failsafe *Soviet-American Relations with Pakistan, Iran and*

Afghanistan Hafeez Malik, 1987-03-02 This is a collective volume on Soviet American relations with the three rimland states of Iran Afghanistan and Pakistan The contributors argue that what happens in these three states would ultimately affect the states in the Gulf and the Middle East The USA maintains friendly relations only with Pakistan while her relations with Iran and Afghanistan are antagonistic The future penetration of the Soviet influence in Iran and Afghanistan is assessed and probable scenarios are discussed by the seventeen contributors who represent the military diplomacy and academia The concluding chapter synthesizes the discussions and the criticism of various papers The book is the most up to date thorough analysis of superpower relations with the three neighbouring states of the Soviet Union currently available Nuclear India in the Twenty-First Century D.
