

Great consult experience with Jon Roz. He took the time to understand specifically what I was concerned about, thoroughly reviewed the state of the basement and proposed a solution that addressed the issue. There was no hard sell of things I don't need - only helpful suggestions. Great experience thus far with Adirondack Basement Systems

Small Things Consideredwhy There Is No Perfect Design:

Small Things Considered Henry Petroski,2007-12-18 Why has the durable paper shopping bag been largely replaced by its flimsy plastic counterpart What circuitous chain of improvements led to such innovations as the automobile cup holder and the swiveling vegetable peeler With the same relentless curiosity and lucid witty prose he brought to his earlier books Henry Petroski looks at some of our most familiar objects and reveals that they are in fact works in progress For there can never be an end to the quest for the perfect design To illustrate his thesis Petroski tells the story of the paper drinking cup which owes its popularity to the discovery that water glasses could carry germs He pays tribute to the little plastic tripod that keeps pizza from sticking to the box and analyzes the numerical layouts of telephones and handheld calculators Small Things Considered is Petroski at his most trenchant and provocative casting his eye not only on everyday artifacts but on their users as well Success Through Failure Henry Petroski,2018-05-29 This book examines the importance of

Belasco,Roger Horowitz,2011-06-03 In recent years the integrity of food production and distribution has become an issue of wide social concern The media frequently report on cases of food contamination as well as on the risks of hormones and cloning Journalists documentary filmmakers and activists have had their say but until now a survey of the latest research on the history of the modern food provisioning system the network that connects farms and fields to supermarkets and the dining table has been unavailable In Food Chains Warren Belasco and Roger Horowitz present a collection of fascinating case studies that reveal the historical underpinnings and institutional arrangements that compose this system The dozen essays in

Food Chains range widely in subject from the pig poultry and seafood industries to the origins of the shopping cart The book examines what it took to put ice in nineteenth century refrigerators why Soviet citizens could buy ice cream whenever they wanted what made Mexican food popular in France and why Americans turned to commercial pet food in place of table scraps for their dogs and cats Food Chains goes behind the grocery shelves explaining why Americans in the early twentieth century preferred to buy bread rather than make it and how Southerners learned to like self serve shopping Taken together these essays demonstrate the value of a historical perspective on the modern food provisioning system **Everyday Life**
