Sipri Yearbook 1993 World Armaments And Disarmament:

Sipri Yearbook 1993 Stockholm International Peace Research Institute, 1993 The SIPRI Yearbook 1993 continues SIPRI's review of the latest developments in nuclear weapons nuclear explosions world military expenditure the international arms trade and arms production chemical and biological weapons the military use of outer space the proliferation of ballistic missile technology armed conflicts in 1992 US Soviet nuclear arms control and conventional arms control in Europe **The Evolution of Biological Disarmament** Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective The Global Spread Of Arms Frederic S Pearson, 2018-02-19 This book surveys the broad terrain covered by the concept of the security dilemma and points out landmarks along the route proceeding from proliferation to economic interests showing that the arms trade is built into development of both industrial technology and political competition *Arms Control and Security: The Changing Role of Conventional Arms Control in Europe* Kevin Wright, 2017-11-01 This title was first published in 2000 The aim of this text is to explore conventional arms control in Europe The early chapters provide a primarily historical perspective looking at the context foundations main provisions and institutional structure of the main agreements The later chapters explore the continuing and likely future roles of the OSCE and NATO in the arms control process The final chapters examine more contemporary developments by looking at the Adapted CFE Treaty and Vienna Documents agreed at the OSCE Istanbul Summit in November 1998 and the challenges posed to existing arrangements by the changing and emergent security threats that potentially face Europe European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the

Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it

The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century On a global scale the central regulatory tool for such responses is public international law But what is the state role and relevance of public international law in today s complex and highly dynamic global security environment Which concepts of security are anchored in international law How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area

Borgeryd, 1999-02 How does the state system measure up to today's realities when it comes to managing conflict To what extent are efforts to manage conflict successful and for whom Prevailing structures designed to deal with conflict between collectives sovereign states supported by militaries military industry and the United Nations operate mainly on principles that are hundreds of years old Conditions for conflict and its management have changed radically since this state system was constructed There is a risk that institutional inertia produces growing disparity between real world problems and the institutions that are supposed to manage them Realism and legalism are found to form a double ideological support for the state system The study compares the state system's realist and legalist premises to different cases of post cold war intercollective conflict the 1990-91 Gulf War the 1990-95 break up of Yugoslavia and the 1992 Los Angeles riots These cases present important challenges to the prevailing system's premises mismatches between idea and reality that are clearly connected to failures in conflict management In addition findings suggest that the state system not only fails to deal with important aspects of modern day conflict but that it increasingly produces problems that it cannot manage This suggests that the prevailing state system is not in harmony with crucial conflict related aspects of global impact indicating a serious systemic problem **Realism versus Global Arms Control and Disarmament** Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship *The Modern Defense Industry* Richard A.
