Events, Places and Societies Nicholas Wise, John Harris, 2019-03-21 Events can be synonymous with a particular place helping shape and promote a location Given the rise of the global events industry this book uncovers how events impact upon places and societies looking at a range of different events and geographical scales Geographers are concerned with how notions of space and place impact people communities and identity and events have played a central role in how places are perceived consumed and even contested This book will discuss international event cases to frame knowledge around the increased demands pressures and complexities that globalisation transnationalism regeneration and competitiveness has put on events places and societies Integrating discussions of theory and practice this book will explore the range of conceptual perspectives linked to how geographers and sociologists understand events and the role events play in contemporary times This involves recognizing histories and planning strategies the purpose of bidding for an event or the local meanings that have emerged and changed in the place This helps us analyse how events have the potential to redefine place identities This international edited collection will appeal to academics across disciplines such as geography planning and sociology as well as students on events management and events studies courses

Sports and Physical Exercise in Early Modern Culture Rebekka von Mallinckrodt, Angela Schattner, 2017-05-15 It is often assumed that a recognisably modern sporting culture did not emerge until the eighteenth century The plethora of physical training and games that existed before 1700 tend to fall victim to rigid historical boundaries drawn between modern and pre modern sports which are concerned primarily with levels of regulation organization and competitiveness Adopting a much broader

and culturally based approach the essays in this collection offer an alternative view of sport in the early modern period Taking into account a variety of competitive as well as non competitive forms of sport physical training and games the collection situates these types of activities as institutions in their own right within the socio cultural context of early modern Europe Treating the period not only as a precursor of modern developments but as an independent and formative era the essays engage with overlooked topics and sources such as court records self narratives and visual materials and with contemporary discussions about space gender and postcolonial studies By allowing for this increased contextualization of sport the collection is able to integrate it into more general historical questions and approaches The volume underlines how developments in early modern sport influenced later developments whilst at the same time being thoroughly shaped by contemporary notions of the body status and honour These notions influenced not only the contemporary sporting fashion but the adoption of sports in elite education the use of sports facilities training methods and modes of competition thus offering a more integrated idea of the place of sport in early modern society
