Philip G. Altbach

Sixties In America History Politics And Protest:

The Sixties in America M. J. Heale, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company *American Patriotism, American Protest* Simon Hall, 2011-06-06 During the 1970s and beyond political causes both left and right the gay rights movement second wave feminism the protests against busing to desegregate schools the tax revolt and the anti abortion struggle drew inspiration from the protest movements of the 1960s Indeed in their enthusiasm for direct action tactics their use of street theater and their engagement in grassroots organizing activists in all these movements can be considered children of the Sixties Invocations of America's founding ideals of liberty and justice and other forms of patriotic protest have also featured prominently in the rhetoric and image of these movements Appeals to the Declaration of Independence and the Bill of Rights have been made forcefully by gay rights activists and feminists for instance while participants in the antibusing movement the tax revolt and the campaign against abortion rights have waved the American flag and claimed the support of the nation's founders In tracing the continuation of quintessentially Sixties forms of protest and ideas into the last three decades of the twentieth century and in emphasizing their legacy for conservatives as well as those on the left *American Patriotism American Protest* shows that the activism of the civil rights New Left and anti Vietnam War movements has shaped America's modern political culture in decisive ways As well as providing a refreshing alternative to the rise and fall narrative through which the Sixties are often viewed Simon Hall's focus on the shared commitment to patriotic protest among a diverse range of activists across the political spectrum also challenges claims that in recent decades patriotism has become the preserve of the political right Full of original and insightful observations and based on extensive archival research *American Patriotism American Protest* transforms our understanding of the Sixties and their aftermath *The Activist 1960s* Robert C. Cottrell, 2023-05-11 Throughout the Long Sixties which spanned much of the seemingly quiescent 1950s and continued into the 1970s progressive activists sought to change American policy both foreign and domestic Beginning with a civil rights crusade that later expanded to a campaign against the Vietnam War the movement eventually splintered into a series of focuses racial ethnic demographic political cultural gender based and environmental This work details activists efforts to ensure basic rights through fostering civic engagement Chapters demonstrate how the various campaigns within the movement were all successful to some extent but none brought about the results that many desired Nonetheless they contributed to a more open egalitarian participatory and emancipated nation that is still being shaped today **The Oxford Encyclopedia of the Modern World**, 2008 The Encyclopedia of the Modern World delves into the period from 1750 to the present providing special attention to social economic cultural and political topics applicable to the time The breadth of knowledge offered within this multivolume set is astounding with features spanning articles on countries regions and ethnic groups themes involving social history demography family life politics economics religion thought education science and technology and culture events such as

major wars and extensive coverage of the United States Detailed articles cover not only the major facts but the interpretations as well and are written for readers who are not specialists in the particular area Enriched with over 800 halftones and 50 maps this reference work is essential for any scholar general reader collector or curator interested in this rich and varied time in history Through its fluent global coverage The Encyclopedia of Modern World provides information about and interpretation of major developments across particular regions both salient events and regional perspectives on common themes such as politics demography social class and gender Readers can explore topics that have global implications such as migration childhood and foods topics that can be viewed through a combination of global patterns and key comparisons Entries also shed light on standard geographic and ethnic units such as Scandinavia Korea or the Gypsies in the modern period The Encyclopedia presents unprecedented coverage of global processes and institutions themselves including the International Red Cross and the League of Nations Publisher

Student Politics in America Philip G. Altbach, 2018-04-27 Students have periodically played an important role in campus political life as well as in societal politics Students were active in the anti slavery movement they rebelled against military service in the Civil War they staged demonstrations during the Depression and they were vocal during the 1960s While activism has subsided somewhat in the past three decades students continue to be involved in significant political issues Student Politics in America is the first book to chronicle the entire history of student political activism in America dealing not only with the periods when students were dramatically involved in politics but also focusing on less active periods This book provides a sense of the entire history of political involvement and the evolution of student organizations and attitudes toward politics Student religious organizations that have been involved in social activism are discussed as are student government organizations which are generally ignored in analyses of campus life Altbach shows that at least since the 1930s there is an ideological trend toward liberal and radical activism yet at the same time conservative student organizations have also been influential Politics on the campus is a multifaceted phenomenon and Altbach handles the complexity of student political life in a carefully nuanced manner In a new preface the author discusses his reasons and motivation for originally writing Student Politics in America In his new introduction he brings the history of student activism and the lack thereof up to date Student Politics in America provides a unique historical perspective on the political activities of college and university students in the United States and will be an important contribution to the personal libraries of educators university administrators students political scientists and historians

American Anti-Nuclear Activism, 1975-1990 K. Harvey, 2014-10-28 Looking at national peace organizations alongside lesser known protest collectives this book argues that anti nuclear activists encountered familiar challenges common to other social movements of the late twentieth century

The Oxford Companion to United States History Paul S. Boyer, Melvyn Dubofsky, 2001 In this volume that is as big and as varied as the nation it portrays are over 1 400 entries written by some 900 historians and other scholars illuminating not only America s political diplomatic and

military history but also social cultural and intellectual trends science technology and medicine the arts and religion

Summer of Love Christoph Grunenberg, Jonathan Harris, Jonathan P. Harris, 2005-01-01 Though more than a generation has passed since the revolutionary fervor of the Summer of Love of 1967 the 1960s in many ways seem with us still From recurring debates over the war in Vietnam to the perpetually appealing music of the Beatles and the Rolling Stone to the concern about youth drug use the legacy of the 1960s is ubiquitous in contemporary life The Summer of Love brings together an impressive group of historians artists and cultural critics to present a rich and varied interpretation of this seminal decade and its continuing influence on politics society and culture The Summer of Love which accompanies an exhibition at Tate Liverpool pays particular attention to the wildly creative psychedelic art of the era Perceptive essays on psychedelic comics graphic design and typography light shows and film successfully rescue psychedelic art from the fog of nostalgia and unjust critical neglect Distinguished contributors also explore the role of 1960s fashion and architecture and they consider anew the central influence of hallucinogenic drugs on the art of the era Running throughout the essays are the elements of epochal change from sexual liberation to student revolutions that still form the backdrop of our collective consciousness of the 1960s An incisive collection of writings on all aspects of 1960s art and culture tempered by time and critical distance The Summer of Love will be indispensable for those who wish they had been there or for those who were but can't remember it

Student Activism in 1960s America Magnus O. Bassey, 2024-08-23 This book sheds light on the untold stories of individual student activists at Queens College New York City during the 1960s Against the backdrop of the ongoing Vietnam War and the assassination of President John F Kennedy some Americans began to lose faith in their government Based on injustices that students saw in their campuses in the country and in the world at large they began to question their political leaders Students organized their discontents over three major issues civil rights free speech and anti war sentiments Their protests involved direct actions such as sit ins marches picketing and boycotts At Queens College QC as the students moved away from the repressive McCarthy era of the 1950s they began to confront and challenge those in power at the college in the 1960s The defining characteristic of this break from the past was a student strike in 1961 in objection to the ban of controversial speakers who had been invited to campus by student clubs The student strike of 1961 gave the activists among them a direct and immediate way to fight power on campus and to fight racism and discrimination The author argues that student movements cannot be attributed to a single explanation and therefore he focuses on individual historical contexts presenting first person narratives from the actual participants and tells their stories in their own voices from their own records and from the documents they left behind The book identifies the QC student activists of the 1960s exploring how and why they became activists their activities their achievement as activists and what motivated them to think that they could make history themselves by confronting racism It provides an intimate look at the students lives and their social justice journey beginning at Queens College and as they moved into their careers

The Oxford Handbook of Postwar European

History Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the thirty five chapters of this book As well as diplomatic political institutional economic and social history The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by an acknowledged expert as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe *The Routledge History of Twentieth-Century United States* Jerald Podair, Darren Dochuk, 2018-05-02 The Routledge History of the Twentieth Century United States is a comprehensive introduction to the most important trends and developments in the study of modern United States history Driven by interdisciplinary scholarship the thirty four original chapters underscore the vast range of identities perspectives and tensions that contributed to the growth and contested meanings of the United States in the twentieth century The chronological and topical breadth of the collection highlights critical political and economic developments of the century while also drawing attention to relatively recent areas of research including borderlands technology and disability studies Dynamic and flexible in its possible applications The Routledge History of the Twentieth Century United States offers an exciting new resource for the study of modern American history Rock'n America Deena Weinstein, 2015-01-01 What is rock This book offers a new and systematic approach to understanding rock by applying sociological concepts in a historical context Deena Weinstein a rock critic journalist and academic starts by outlining an original approach to understanding rock explaining how the form has developed through a complex and ever changing set of relations between artists fans and mediators She then traces the history of rock in America through its distinctive eras from rock s precursors to rock in the digital age The book includes suggested listening lists to accompany each chapter a detailed filmography of movies about rock and a wide range of visuals and fascinating anecdotes Never separating rock music from the social political economic and cultural changes in America s history Rock n America provides a comprehensive overview of the genre and a new way of

appreciating its place in American society *Theories of Play and Postmodern Fiction* Brian Edwards, 2013-05-13 Drawing on developments in critical theory and postmodernist fiction this study makes an important contribution to the appreciation of playforms in language texts and cultural practices Tracing trajectories in theories of play and game and with particular attention to the writings of Nietzsche Wittgenstein Bakhtin and Derrida the author argues that the concept of play provides perspectives on language and communication processes useful both for analysis of literary texts and also for understanding the interactive nature of constructions of knowledge Exploring manifestations of game and play throughout the history of Western culture from Plato to Pynchon this study traces developments in 20th century cultural and literary theory of ideas about play in the writings of Johan Huizinga Roger Caillois Jacques Ehrmann Bernard Suits James Hans Mihai Spariosu and Robert Rawdon Wilson The author emphasizes post structuralist developments with specific attention to deconstruction and reception theory and argues that deconstruction makes the most significant recent contribution to play theory in its application to language and to literature The work also explores the modes and effects of playforms in particular examples of postmodernist fiction With attention to major works from Thomas Pynchon Gravity s Rainbow John Barth LETTERS Robert Kroetsch What the Crow Said Angela Carter Nights at the Circus and Peter Carey Illywhacker Edwards acknowledges and deconstructs such basic oppositions as play and seriousness fiction and truth difference and identity to explore the literature s cultural political significance Seeking to affirm the fiction s continuing social relevance the readings presented in this book place play irresistibly at the heartland of language meaning and culture Pro Football in the 1960s Patrick

Gallivan, 2020-06-22 The 1960s were a tumultuous period in U S history and the sporting world was not immune to the decade s upturn of tradition As war in Southeast Asia civil unrest at home and political assassinations rocked the nation professional football struggled to attract fans While some players fought for civil rights and others fought overseas the ideological divides behind the protests and riots in the streets spilled into the locker rooms and athletes increasingly brought their political beliefs into the sports world This history describes how a decade of social upheaval affected life on the gridiron and the personalities and events that shaped the game The debut of the Super Bowl soon to become a fixture of American culture marked a professional sport on the rise Increasingly lucrative television contracts and innovations in the filming and broadcasting of games expanded pro football s audiences An authoritarian old guard best represented by the revered Vince Lombardi began to give way as star players like Joe Namath commanded new levels of pay and power And at last all teams fielded African American players belatedly beginning the correction of the sport s greatest wrong Nationalism and

Internationalism Intertwined Pasi Ihalainen, Antero Holmila, 2022-03-11 It is commonplace that the modern world is more international than at any point in human history Yet the sheer profusion of terms for describing politics beyond the nation state including international European global transnational and cosmopolitan among others is but one indication of how conceptually complex this field actually is Taking a wide view of internationalism s in Europe since the eighteenth century

Nationalism and Internationalism Intertwined explores discourses and practices to challenge nation centered histories and trace the entanglements that arise from international cooperation A multidisciplinary group of scholars in history discourse studies and digital humanities asks how internationalism has been experienced understood constructed debated and redefined across different European political cultures as well as related to the wider world *To Deter and Punish* Silke Zoller,2021-07-27 In the late 1960s and early 1970s governments in North America and Western Europe faced a new transnational threat militants who crossed borders with impunity to commit attacks These violent actors cooperated in hijacking planes taking hostages and organizing assassinations often in the name of national liberation movements from the decolonizing world How did this form of political violence become what we know today as international terrorism lacking in legitimacy and categorized first and foremost as a crime *To Deter and Punish* examines why and how the United States and its Western European allies came to treat nonstate terrorists as a key threat to their security and interests Drawing on a multinational array of sources Silke Zoller traces Western state officials attempts to control the meaning of and responses to terrorism from the first Palestinian hijacking in 1968 to Ronald Reagan s militarization of counterterrorism in the early 1980s She details how Western states sought to criminalize border crossing nonstate violence and thus delegitimized offenders political aspirations U S and European officials pressured states around the world to join agreements requiring them to create and enforce criminal laws against alleged individual terrorists Zoller underscores how recently decolonized states countered that only a more equitable global system capable of addressing political grievances would end the violence *To Deter and Punish* offers a new account of the emergence of modern counterterrorism that pinpoints its international dimensions a story about diplomats and bureaucrats as well as national liberation militancy and the processes of decolonization

Encyclopedia of Politics of the American West Steven L. Danver,2013-04-25 The Encyclopedia of Politics in the American West is an A to Z reference work on the political development of one of America s most politically distinct not to mention its fastest growing region This work will cover not only the significant events and actors of Western politics but also deal with key institutional historical environmental and sociopolitical themes and concepts that are important to more fully understanding the politics of the West over the last century

Political Protest and Cultural Revolution Barbara Epstein,1991-03-14 From her perspective as both participant and observer Barbara Epstein examines the nonviolent direct action movement which inspired by the civil rights movement flourished in the United States from the mid seventies to the mid eighties Disenchanted with the politics of both the mainstream and the organized left and deeply committed to forging communities based on shared values activists in this movement developed a fresh philosophy and style of politics that shaped the thinking of a new generation of activists Driven by a vision of an ecologically balanced nonviolent egalitarian society they engaged in political action through affinity groups made decisions by consensus and practiced mass civil disobedience The nonviolent direct action movement galvanized originally in opposition to nuclear power with the

Clamshell Alliance in New England and then the Abalone Alliance in California leading the way Its influence soon spread to other activist movements for peace non intervention ecological preservation feminism and gay and lesbian rights Epstein joined the San Francisco Bay Area s Livermore Action Group to protest the arms race and found herself in jail along with a thousand other activists for blocking the road in front of the Lawrence Livermore Laboratory She argues that to gain a real understanding of the direct action movement it is necessary to view it from the inside For with its aim to base society as a whole on principles of egalitarianism and nonviolence the movement sought to turn political protest into cultural revolution

Political Keywords Roderick P. Hart, 2005 The Declaration of Independence states that all men are created equal in the United States but that statement does not hold true for words Some words carry more weight than others they seem to work harder get more done and demand more respect Political Keywords Using Language That Uses Us looks at eight dominant words that are crucial to American political discourse and how they have been employed during the last fifty years Based on an analysis of eleven separate studies of political language Political Keywords helps readers to understand what these terms mean and how they are used For example the book tracks what politics now means to modern commentators how school teachers impress certain values upon the nation s children by invoking the office of the president and why an innocent word like government sometimes makes people so upset It details how the people are referenced in political talk and how the media portray themselves The book also considers the work done by political parties political promises and political consultants because together they shed special light on modern elections Combining social science with subtle forms of cultural interpretation Political Keywords Using Language That Uses Us provides a fresh look at both American politics and American language It is an ideal text for undergraduate and graduate courses in political communication political language political campaigns media and politics political psychology public opinion rhetorical criticism contemporary public address and presidential rhetoric Publisher **1968** Gassert Phillipp Gassert, 2019-10-15 It was a year of seismic social and political change With the wildfire of uprisings and revolutions that shook governments and halted economies in 1968 the world would never be the same again Restless students workers women and national liberation movements arose as a fierce global community with radically democratic instincts that challenged war capitalism colonialism and patriarchy with unprecedented audacity Fast forward fifty years and 1968 has become a powerful myth that lingers in our memory Released for the fiftieth anniversary of that momentous year this second edition of Philipp Gassert s and Martin Klimke s seminal 1968 presents an extremely wide ranging survey across the world Short chapters written by local eye witnesses and historical experts cover the tectonic events in thirty nine countries across the Americas Europe Asia Australia Africa and the Middle East to give a truly global view Included are forty photographs throughout the book that illustrate the drama of events described in each chapter This edition also has the transcript of a panel discussion organized for the fortieth anniversary of 1968 with eyewitnesses Norman Birnbaum Patty Lee Parmalee and Tom Hayden and moderated by the book s editors Visually engaging

and comprehensive this new edition is an extremely accessible introduction to a vital moment of global activism in humanity's history perfect for a high school or early university textbook a resource for the general reader or a starting point for researchers
