Repression in Marx, Weber and Freud Dewan S Arefin, 2016-06-16 Sigmund Freud is widely known for his extraordinary contribution to the world of psychology especially to the domain of psychoanalysis But he is less known as a social theorist His contribution in this area is quite extensive important and relevant for understanding of many social facts including the delicate process of social change His utterings are worthwhile reasonable and scientific to a great extent Freud is not valuable only for his theoretical activities but he is also inevitable for locating a better profile of human behavior society culture and civilization By exhibiting the fact that neither the unconscious was absolute eternal or unalterable nor the conscious he emphasized the idea that the reality and psyche were interdependent Social circumstances and psyche shaped and conditioned each other neither could grow in isolation Freud pointed out that there was a conflict within each individual and that was the fundamental feature of socialization into every society an unavoidable Repression characterizing human life Repression occupies a major area in Freudian literature so does the idea of social distance Social distance according to Freud is not only a biological entity but also is a functional entity Social distance as is adhered to by the Marxian dialectical materialists as being the creation of private property and its disproportionate ownership identified as a symbol of superiority

in any such spheres as power prestige privilege etc is considered to be an inevitable phenomenon in human existence and its movement forward

**American Political Ideologies** Brian R. Farmer, 2014-11-01 For many people the world of politics is defined by ideologies The average voter rarely takes time to research a policy issue thoroughly relying instead on a set of beliefs set forth by his or her chosen political organization to make important decisions These publicly promoted ideologies play an important role in international as well as domestic political development yet many adherents to a particular belief may have a poor understanding of competing ideologies From right wing to the far left this text dissects eight prominent political ideologies traditional conservatism classic liberalism libertarianism conservative extremism contemporary liberalism communism dependency theory and Islamism In plain terms it describes the basic doctrine and inherent contradictions of each creed along with its particular relevance to today's political landscape An in depth discussion of the political socialization processes that form and perpetuate ideologies is also included Instructors considering this book for use in a course may request an examination copy here

*Deepening Democracy Latin America* Kurt Von Mettenheim, James Malloy, 1998-07-15 Ten leading scholars of the region present original research to argue that theories of democratic consolidation or institutionalization are too often Euro and ethno centric that simple appeals for greater participation are insufficient and that recent critics of populism patronage and presidentialism fail to capture new opportunities for democracies in the region
