Sociology Of Community Connections:

The Sociology of Community Connections John G. Bruhn, 2007-02-03 Community is a key concept in sociology. In the last decade, especially with the explosion of electronic communication, the definition of community has changed. There is now a need to define the concept of community and tie it to the various levels of human interaction from the global to the individual. Currently, there are many books that address many aspects of community, but there is a lack of text which connects the concept of community with the range of issues from the macro level to the micro level. This book will discuss the rationale for community, the varieties of communities, the effect of social change on communities, and many other factors of connectedness, as well as the costs for losing it. The Sociology of Community Connections John G. Bruhn, 2011-07-20 **The Sociology of**

Community Connections John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world, particularly in the United States. Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decades of the 20th century. Nonetheless, people exist in groups and connections are vital to their existence and in the daily performance of activities. The second edition of *The Sociology of Community Connections* will identify and help students understand community connectedness in the present and future. Encyclopedia of Social Problems Vincent N. Parrillo, 2008-05-22 From terrorism to social inequality and from health care to environmental issues, social problems affect us all. The Encyclopedia will offer an interdisciplinary perspective into these and many other social problems that are a continuing concern in our lives, whether we confront them on a personal, local, regional, national, or global level. *Contractual Communities in the Self-Organising City* Grazia Brunetta, Stefano Moroni, 2012-01-05 Both land use regulation and territorial collective services have traditionally been accomplished in cities through coercive efforts of public administrations. Recently, land use regulation and collective service provision regimes have emerged within contractual communities, territory-based organisations, usually but not exclusively residential, such as homeowners' associations. This book examines the problems and opportunities of contractual communities, avoiding both the alarmism and unwarranted apologies found in much of the literature on contractual communities. The central notion is that cases in which coercive action by a public agency was deemed indispensable have been unjustly overstated, while the potential benefits of voluntary self-organising processes have been seriously understated. The authors propose a revised notion of the state role that allows ample leeway for contractual communities of all forms.

How To Create Societies for Human Wellbeing Matthew Fisher, 2024-10-15 Wellbeing is a hot topic. Governments, psychologists, and a thousand self-appointed experts all claim to promote it, and yet our societies are experiencing record levels of mental distress and ill health. Why? The Connected City Zachary P. Neal, 2012-08-06 The Connected City explores how thinking about networks helps make sense of modern cities what they are how they work and where they are headed Cities and urban life can be examined as networks and these urban networks can be examined at many different levels The book focuses on three levels of urban networks micro meso and macro These levels build upon one another and require distinctive analytical approaches that make it possible to consider different types of questions At one extreme micro urban networks focus on the networks that exist within cities like the social relationships among neighbors that generate a sense of community and belonging At the opposite extreme macro urban networks focus on networks between cities like the web of nonstop airline flights that make face to face business meetings possible This book contains three major sections organized by the level of analysis and scale of network Throughout these sections when a new methodological concept is introduced a separate method note provides a brief and accessible introduction to the practical issues of using networks in research What makes this book unique is that it synthesizes the insights and tools of the multiple scales of urban networks and integrates the theory and method of network analysis
