The Sociology of HIV Transmission Michael Bloor, 1995-09-13 In this broad ranging book Michael Bloor gives an overview of our current understanding of the social conditions and contexts of HIV transmission The author examines the social epidemiology of HIV transmission in its different manifestations in the developing world and in the West looking at heterosexual and homosexual transmission sex tourism and prostitution injecting drug users haemophiliacs and transfusion recipients He goes on to look at reports of sociological studies of risk behaviour among men who have sex with men among heterosexual and bisexual men and women and among those who share syringes Drawing on his own research Michael Bloor presents a critical examination of the different theoretical models of Women, Families and HIV/AIDS Carole A.

Campbell, 1999-04-13 Carole Campbell examines the position of women in the AIDS epidemic women living with HIV and women caring for HIV infected family members in a sociocultural context Campbell draws a connection among women's risk of AIDS gender roles particularly adolescent gender role socialization and male sexual behavior demonstrating that efforts to contain the spread of the disease to females must also target the male behavior that puts women at risk This study concludes that compared with men HIV infected women face unequal access to care and unequal quality of care Informed by the moving personal accounts of eleven HIV infected men and women this book offers a rare broad picture of the sociocultural causes and the impact on American society of AIDS among women *Readings in the Sociology of AIDS* Anthony J.

Psychology and Sociology Applied to Medicine Beth Alder, Edwin van Teijlingen, MA, MEd, PhD, Michael Porter, BA, MPhil, 2009-06-17 This textbook in the Illustrated Colour Text series offers an integrated treatment of sociology and psychology for medical students It is presented in a much more colourful and graphic format than is usual for books on these two subjects This integration reflects the tendency to teach these two subjects together as behavioural science with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon The book reflects these trends and has been successful and popular with students An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences Use of case studies and Stop Think boxes encourages critical thinking and discussion Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on This third
