## **Socrates Children Thinking And Knowing In The Western Tradition:**

*Socrates' Children* Trudy Govier, 1997-08-06 How do Humans Think How should we think Almost all of philosophy and a great deal else depends in large part on the answers that we provide to such questions Yet they are almost impossible to deal with in isolation notions about nature of thought are almost bound to connect with metaphysical notions about where ideas come from with notions about appropriate arenas for certainty doubt and belief and hence with moral and religious ideas The Western tradition of thinking about thinking takes shape with Socrates among the other important strands covered in this book are Descartes recipe for discovering truth through systematic doubt Hume s notion that all our ideas are copies of sense impressions Wollstonecraft s introduction of the perspective of gender into such questions and Wittgenstein s claim that much of the traditional terrain of Western philosophy should be thought of as the proper domain only of linguistic assertion possessing no content beyond the words With each philosopher and school of thought dealt with Govier shows how ideas about thinking connect to the other elements of the particular philosophy and brings to life the social and intellectual context that the ideas spring from *Socrates Children* is thus not only an investigation of notions of thinking and knowing in Western culture it is a selective general history of much of Western philosophy from a unique and fascinating perspective

**Dialectic and Rhetoric** F.H. van Eemeren, Peter Houtlosser, 2013-03-14 This volume discusses two distinct perspectives on the analysis of argumentative discourse the dialectical and the rhetorical perspective It intends to open a thorough discussion of the two approaches their commonalities and differences and the ways in which in some combination or other they can be used to further the development of sound analytic tools for dealing with argumentation

Wollstonecraft and Religion Brenda Ayres, 2024-01-16 Ever since Godwin announced to the world in *Memoirs* that Wollstonecraft had had little use for religion most biographers scholars historians and readers have regarded her as an apostate Further the existing scholarly texts fail to demonstrate the pervasiveness of biblical references in *A Vindication of*

the Rights of Woman The true tally of scriptural references approaches over 1 100 as identified in this study Wollstonecraft's biblical allusions besides sheer volume are noteworthy because they gave women a biblical basis upon which to contend for better education and occupational opportunities as well as for legal and political independence That the arguments were couched in biblical rhetoric most likely contributed to their initial reception and tolerance of what were incendiary ideas and searing social criticism The recognition and analysis of biblical underpinnings in Wollstonecraft and Religion not only of Rights of Woman but also of her other publications and letters propose new consideration regarding the Mother of Feminism and her work The chapters that accompany the annotated text of Rights of Woman furnish biographical and historical context that offer fresh perspectives about Wollstonecraft's religious convictions and faith many of which have not been published elsewhere

Citizens' Hall Andr   Carrel, 2011-02-25 Based on years of practical experience in small towns Carrel argues for municipal autonomy for turning what are now colonies of the federal and provincial orders of government into independent mature and fully democratic entities For Carrel the citizen is the sole legitimate source of political power and the best tool for citizen empowerment is the controversial tool of the referendum This is the story of how a small municipality broke the rules of local government It also recounts the author's irreverence for the status quo and his ideas on the rebuilding of citizenship at the community level

Reasonable Responses Catherine E. Hundleby, 2017-01-17 This tribute to the breadth and influence of Trudy Govier's philosophical work begins with her early scholarship in argumentation theory paying special attention its pedagogical expression Most people first encounter Trudy Govier's work and many people only encounter it through her textbooks especially A Practical Study of Argument published in many editions In addition to the work on argumentation that has continued throughout her career much of Govier's later work addresses social philosophy and the problems of trust and response to moral wrongs The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life While following the timeline of Govier's research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy A Practical Study of Argument first published in 1985 situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research Takuzo Konishi argues Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts Shifting gears to social philosophy but still addressing education Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of audit culture for teaching At the centre of this volume social philosophy receives an abstract meta ethical defense from Linda Radzik Moving solidly into the domain of normative social philosophy Alice MacLachlan reconsiders Govier's condemnation of revenge by viewing it as a form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation MacLachlan ultimately agrees that revenge is morally indefensible The practical challenges of addressing

others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers Alistair Little and Wilhelm Verwoerd explain and Kathryn Norlock argues that forgiveness is psychologically vexed too People may recognize transformation to be in principle possible for all people Norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception Finally Govier responds to the various papers
