The Acadian Diaspora Christopher Hodson, 2012-05-01 Late in 1755 an army of British regulars and Massachusetts volunteers completed one of the cruelest most successful military campaigns in North American history capturing and deporting seven thousand French speaking Catholic Acadians from the province of Nova Scotia and chasing an equal number into the wilderness of eastern Canada Thousands of Acadians endured three decades of forced migrations and failed settlements that shuttled them to the coasts of South America the plantations of the Caribbean the frigid islands of the South Atlantic the swamps of Louisiana and the countryside of central France *The Acadian Diaspora* tells their extraordinary story in full for the first time illuminating a long forgotten world of imperial desperation experimental colonies and naked brutality Using documents culled from archives in France Great Britain Canada and the United States Christopher Hodson reconstructs the lives of Acadian exiles as they traversed oceans and continents pushed along by empires eager to populate new frontiers with inexpensive pliable white farmers Hodson's compelling narrative situates the Acadian diaspora within the dramatic geopolitical changes triggered by the Seven Years War Faced with redrawn boundaries and staggering national debts imperial architects across Europe used the Acadians to realize radical plans tropical settlements without slaves expeditions to the unknown southern continent and perhaps strangest of all agricultural colonies within old regime France itself In response Acadians embraced their status as human commodities using intimidation and even violence to tailor their communities to the superheated Atlantic market for cheap mobile labor Through vivid intimate stories of Acadian exiles and the diverse transnational cast of characters that surrounded them *The Acadian Diaspora* presents the eighteenth century Atlantic world from a new angle challenging old assumptions about uprooted peoples and the very nature of early modern empire

Fashioning Acadians Hilary Doda, 2023-10-24 What people wore in the distant past is often challenging to determine owing to the disintegration of natural textiles and materials over time Yet when new findings from archaeological excavations are compared with documentation about early Acadia a fascinating picture of the

society's early fashions is revealed *Fashioning Acadians* is a history of clothesmaking and dress in Acadia from 1650 to 1750 Through the analysis of four Acadian settlements in what is now Nova Scotia Hilary Doda uncovers the regional fashions and trends that had begun to emerge prior to the violence of the deportations of 1755 Men's and women's wardrobes are described from head to toe from headdresses and hairstyles down to stockings and shoes along with accessories such as buttons buckles and jewellery While Acadians retained many aspects of the fashion systems of France New France and New England a distinctive Acadian identity can be seen to take shape as their dress evolved and was influenced by other regional styles Exploring the possibilities of a new methodology for identifying lost or decayed garments Doda argues that surviving notions sewing tools and accessories the small finds of archaeological sites are important sources of information not only about domestic life but about manufacturing processes dress and textile cultures and the influence of intersecting fashion systems in colonial spaces *Fashioning Acadians* expands our understanding of Acadian lives and their connections to both the Atlantic world of goods and the landscapes of Nova Scotia

In the Province of History Ian McKay, Robin Bates, 2010 How a region sells and misrepresents its past

The Slow Rush of Colonization Thomas Peace, 2023-06-01 In 1760 after Montcalm's defeat at the Plains of Abraham the French Empire was definitively expelled from the Saint Lawrence Valley This history is well known Less well known is that this decisive victory had its roots almost a hundred years earlier when settler colonial systems of power first took root on the peripheries of the Maritime Peninsula the places known today as Quebec Maritime Canada and New England Drawing on the concept of spaces of power historian Thomas Peace demonstrates that despite imperial changes of power and settler colonial incursions on their Lands local Mi'kmaq Wabanaki Peskotomuhkati Wolastoqiyik and Wendat nations continued to experience the contested Peninsula as a cohesive whole rather than one defined by subsequent colonial borders This engaging history shows how overlapping concepts of space and power shaped deeply by Indigenous agency and diplomacy defined relationships in the eighteenth century Maritime Peninsula and how following the Seven Years War this history was brushed aside as settlers flooded into the Peninsula laying the groundwork from which Canada and the United States would develop

Revisiting 1759 Phillip Alfred Buckner, John G. Reid, 2012-01-01 This cohesive collection investigates many of the most hotly contested questions surrounding the Conquest Was the battle itself a crucial turning point or just one element in the global struggle between France and Great Britain Did the battle's outcome reflect the superior strategy of General James Wolfe or rather errors on both sides Did the Conquest alter the long term trajectories of the French and British empires or simply confirm patterns well underway How formative was the Conquest in defining the new British America and those now living under its rule

Powering Up Canada R.W. Sandwell, 2016-11-01 With growing concerns about the security cost and ecological consequences of energy use people around the world are becoming more conscious of the systems that meet their daily needs for food heat cooling light transportation communication waste disposal medicine and goods *Powering Up Canada* is the first book to examine in detail

how various sources of power fuel and energy have sustained Canadians over time and played a pivotal role in their history Powering Up Canada investigates the ways that the production processing transportation use and waste issues of various forms of energy changed over time transforming almost every aspect of society in the process Chapters in the book's first part explore the energies of the organic regime food animal muscle water wind and firewood while those in the second part focus on the coal oil gas hydroelectricity and nuclear power that define the mineral regime Contributors identify both continuities and disparities in Canada's changing energy landscape in this first full overview of the country's distinctive energy history Reaching across disciplinary boundaries these essays not only demonstrate why and how energy serves as a lens through which to better understand the country's history but also provide ways of thinking about some of its most pressing contemporary concerns Engaging Canadians in an urgent international discussion on the social and environmental history of energy production and use and its profound impact on human society Powering Up Canada details the nature and significance of energy in the past present and future Contributors include Jenny Clayton University of Victoria George Colpitts University of Calgary Colin Duncan Queen's University J I Little Emeritus Simon Fraser University Joanna Dean Carleton University Matthew Evenden University of British Columbia Laurel Sefton MacDowell Emerita University of Toronto Mississauga Joshua MacFadyen Arizona State University Eric Sager University of Victoria Jonathan Peyton University of Manitoba Steve Penfold University of Toronto Philip van Huizen McMaster University Andrew Watson University of Saskatchewan and Lucas Wilson independent scholar

The Discovery of Weather Jerry Lockett, 2012-09-26 In the mid nineteenth century the new science of weather forecasting was fraught with controversy on both sides of the Atlantic In the United States a bitter dispute about the nature of storms had raged for decades and forecasting was hampered by turf wars then halted by the Civil War Forecasters in England struggled with the scientific establishment for recognition and vied with astrologers and other charlatans for public acceptance One of the voices in this struggle was Stephen Saxby a British naval instructor who thought he had found a sure fire way of forecasting storms He championed a popular but somewhat eccentric theory that weather disturbances are linked to stages in the moon's orbit of the earth Saxby got lucky One of his well known long range predictions for a serious storm on October 4 1869 was right on the button On that very day a deadly hurricane caused massive floods along the eastern seaboard of the United States then barrelled ashore at the Canadian border The timing of the storm could hardly have been worse Coinciding with an extremely high tide the resulting storm surge breached centuries old dykes at the head of the Bay of Fundy In The Discovery of Weather author Jerry Lockett traces the early days of weather forecasting the background to Saxby's prediction and the drama of the storm itself

Jeffrey Bolster, 2012-10-08 Since the time of the Vikings the Atlantic has shaped the lives of people who depend on it for survival and people have shaped the Atlantic In his account of this interdependency Bolster a historian and professional seafarer takes us through a millennium long environmental history of our impact on one of the largest ecosystems in the world

Against the Seas Mary Soderstrom, 2023-02-28 An incredible read While unflinching in her analysis Soderstrom nevertheless gifts us with a message of hope and resilience MAUDE BARLOW activist and author of *Still Hopeful Lessons from a Lifetime of Activism* What can we learn about coping with rising sea levels from ancient times The scenario we are facing is scary within a few decades sea levels around the world may well rise by a metre or more as glaciers and ice caps melt due to climate change Large parts of our coastal cities will be flooded the basic outline of our world will be changed and torrential rains will present their own challenges But this is not the first time that people have had to cope with threatening waters because sea levels have been rising for thousands of years ever since the end of the last Ice Age Stories told by the Indigenous people in Australia and on the Pacific coast of North America and those found in the Bible and the Epic of Gilgamesh as well as Roman and Chinese histories all bear witness to just how traumatic these experiences were The responses to these challenges varied people adapted by building dikes canals and seawalls by resorting to prayer or magic and very often by moving out of the way of the rushing waters *Against the Seas* explores these stories as well as the various measures being taken today to combat rising

waters focusing on five regions Indonesia Shanghai the Sundarbans of Bangladesh the Salish Sea and the estuary of the St Lawrence River What happened in the past and what is being tried today may help us in the future and if nothing else give us hope that we will survive **Canadian Books in Print.
