MODULA-2 and ADA Richard S. Wiener, Richard F. Sincovec, 1984-02-15 This clear in depth presentation examines each stage of the software engineering process supported by numerous case studies in Modula 2 and Ada Geared to computer science undergraduates Discusses software specifications design implementation testing and maintenance Emphasis is on object oriented design and modular software construction Summary sections and exercises are provided with each chapter

System Development and Ada A. Nico Habermann, Ugo Montanari, 1987-09-23 The collection of papers published in this book was initially presented at the Workshop on Software Factories and Ada held on Capri May 26 30 1986 The subject of the book is software development environments Software development is treated from three viewpoints methodologies language issues and mechanisms Of particular interest are the discussions of automation of the development process and the formalization of software development specifications Several new methodologies are described many of which are available on the commercial market New is in particular the formalization of the design and development process Interesting ideas are presented on planning the design process and on supporting project management by formal tools The reader will find a

variety of interesting methodologies and mechanisms that are operational The book is suitable for readers interested in knowing in which direction programming environment research is moving Managing Ada Projects Using Software Engineering Jag Sodhi,1990 *Slaying the Software Dragon ... A Look at How Software Engineering, the Ada Programming Language and Process Maturity Are Changing Software Development* ,1991 The cost of software today consumes over ten percent of the DoD budget Software costs complexity and size continue to rise because of the ever increasing dependence of weapons and general purpose systems on computers Software engineering the Ada programming language and efforts to determine the performance and risk of software development organizations by measuring process maturity represent key initiatives by the DoD to improve the quality reliability and maintainability of the software DoD buys This study examines and describes each of these areas based on current literature and interviews with officers of 37 companies engaged in software development for command control and communications systems *Ada Implementation Guide.
