

Portability

- In addition to making hardware backward compatible, we have also made software **portable**.
- In describing software, “portable” means that the software can be run on a variety of computers. Another term used is independence, in this case machine or **hardware independence**. Assembly’s use of specifics of the registers makes it machine dependent.
- One has to program at a ***higher level*** to gain machine independence.
- Of course, someone must deal with the specifics of the hardware but it doesn’t have to be you (Layering).
