Golombek, 1997 *Exploration and Engineering* Erik M. Conway, 2015-03-30 Although the Jet Propulsion Laboratory in Pasadena California has become synonymous with the United States planetary exploration during the past half century its most recent focus has been on Mars Beginning in the 1990s and continuing through the Mars Phoenix mission of 2007 JPL led the way in engineering an impressive rapidly evolving succession of Mars orbiters and landers including roving robotic vehicles whose successful deployment onto the Martian surface posed some of the most complicated technical problems in space flight history In *Exploration and Engineering* Erik M Conway reveals how JPL engineers creative technological feats led to major breakthroughs in Mars exploration He takes readers into the heart of the lab's problem solving approach and management structure where talented scientists grappled with technical challenges while also coping not always successfully with funding shortfalls unrealistic schedules and managerial turmoil Conway JPL's historian offers an insider's perspective into the changing goals of Mars exploration the ways in which sophisticated computer simulations drove the design process and the remarkable evolution of landing technologies over a thirty year period A masterpiece of research and writing *Quest History of Spaceflight Quarterly* A must for any reader of modern astronomy who wants insights into how the lab conducts its research solves problems and handles technological challenges *Midwest Book Review* A great tale of ambition mishap and recovery building on extensive archival research and interviews with JPL managers scientists and engineers to deliver a detailed overview of each mission's feats and failures *Exploration and Engineering* is a great book for everyone seriously interested in the struggles and achievements of JPL as NASA's centre for Mars exploration *Sky at Night* Erik M Conway is a historian of science and technology at the Jet Propulsion Laboratory California Institute of Technology He is the author of *Atmospheric Science at NASA A History* *Going to Mars* Brian Muirhead, Judith Reeves-Stevens, Garfield Reeves-Stevens, 2004 A scientist with the Jet Propulsion Laboratory offers an inside look at the future of manned missions to Mars tracing the history of Mars exploration and shedding new light on the future directions of expeditions to the Red Planet

Mars Robert Godwin, 2004 In 1877 the famed Italian astronomer Giovanni Schiaparelli used his brand new 8.6 inch telescope to study the planets To his great surprise he suspected that he saw symmetry on Mars In the years that followed one astronomer after another looked at the red planet and gradually a mythology was formed a mythology of alien intellect

By the 1890 s the martial influence had spilled over into all walks of life and sparked philosophical debates and wondrous fictions Scientists fantasists and people of all creeds looked up and wondered is there life out there Now more than a century later nations around the world are bombarding Mars with an unprecedented fleet of exploratory vehicles Their journey taking less time than it took Amundsen and Shackleton to reach the poles of Earth these small but hardy robotic emissaries are thrusting their way through the depths of interplanetary space to take up residence in the barren Martian deserts Their goal is to answer one of the oldest questions in mankind s history Is there life out there In this sequel to the best selling first volume the reader is brought up to date with the most recent results from our nearest neighbour Filled with a wealth of facts about the latest fleet of Martian explorers as well as a look at what may be coming next in mankind s most ambitious quest for knowledge Includes DVD V DVD ROM featuring Exclusive interviews with Mars Rover Mission Scientist Steve Squyres Senior Flight Engineer Rob Manning Mission Manager Jim Eriksen the complete Cornell animation of the Rovers created by Maas Digital a NASA animation of a proposed Manned Mars mission the exciting mission control broadcast of the landing of Opportunity in Meridiani Planum and as an added extra special bonus extremely rare video of Dr Wernher von Braun filmed in 1976 at the occasion of his last public speech about Mars exploration [Mars Pathfinder Project](#) , Describes the Mars Pathfinder mission which will be the second of NASA s low cost planetary Discovery missions and will include a stationary lander and a surface rover The launch date is scheduled for December 5 1996 Provides information on the scientific objectives and the scheduled events of the mission Includes information on the projected landing site entry landing strategy and high resolution views of the landing site Links to other Mars mission sites **Roving Mars** Steven Squyres,2005-08-03 Steve Squyres is the face and voice of NASA s Mars Exploration Rover mission Squyres dreamed up the mission in 1987 saw it through from conception in 1995 to a successful landing in 2004 and serves as the principal scientist of its 400 million payload He has gained a rare inside look at what it took for rovers Spirit and Opportunity to land on the red planet in January 2004 and knows firsthand their findings **The Mars Pathfinder** Price Pritchett,Brian Muirhead,1998 **Marswalk One** Shayler David,Andrew Salmon,Michael D. Shayler,2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment The book accepts that the journey will be made but does not specify precisely when Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission

objectives This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo Skylab Salyut Mir Shuttle and ISS Viking Luna Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate When the decision is finally made to go to Mars it will be made in the knowledge that most of the world knows why we are going and what benefits mankind will see for the effort The authors primary objective is to begin this understanding

Managing Martians Donna Shirley, 1999-06-01 Donna Shirley's 35 year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner the solar powered self guided microwave oven sized rover was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet The event marked a milestone in space but for Donna Shirley the leader of the mostly male team that designed and built Sojourner and the first woman ever to manage a NASA program it marked a triumph of another kind Managing Martians is Shirley's captivating memoir of a life and career spent reaching for the stars From her seemingly outlandish aspiration at age ten to build aircraft to abandoning high school Home Ec in favor of mechanical drawing and at sixteen becoming a licensed pilot Shirley defied expectations from the beginning In a vivid narrative rich with anecdotes and thrilling turning points Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team Her moment by cliffhanging moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration

Mars Rover Curiosity Rob Manning, William L. Simon, 2014-10-21 The firsthand account of the trials and tribulations of engineering one of the most complex pieces of space technology the Mars Rover Curiosity by its chief engineer Rob Manning In the course of our enduring quest for knowledge about ourselves and our universe we haven't found answers to one of our most fundamental questions Does life exist anywhere else in the universe Ten years and billions of dollars in the making the Mars Rover Curiosity is poised to answer this all important question In Mars Rover Curiosity An Inside Account from Curiosity's Chief Engineer Rob Manning the project's chief engineer tells of bringing the groundbreaking spacecraft to life Manning and his team at NASA's Jet Propulsion Laboratory tasked with designing a lander many times larger and more complex than any before faced technical setbacks fights over inadequate resources and the challenges of leading an army of brilliant passionate and often frustrated experts Manning's fascinating personal account which includes information from his exclusive interviews with leading Curiosity scientists is packed with tales of revolutionary feats of science technology and engineering Readers experience firsthand the disappointment at encountering persistent technical problems the agony of near defeat the sense of victory at finding innovative solutions to these problems the sheer terror of staking careers and

reputations on a lander that couldn't be tested on Earth and the rush of triumph at its successful touchdown on Mars on August 5, 2012. This is the story of persistence, dedication, and unrelenting curiosity. [Return to Mars](#), 1998. Site presents a description of the Pathfinder Mars mission landing. Includes animated graphics of the space probe landing and surface phases of the expedition, photographs, and a video clip of the Sojourner rover and photographs of Mars, some in 3D. Also includes a user forum, resources, and links.
