

Passive Heating Techniques

PASSIVE HEATING

- Passive solar design uses sunshine to heat and light for homes and other buildings without mechanical or electrical devices.
- Heating the building through the use of solar energy involves the absorption and storage of incoming solar radiation, which is then used to meet the heating requirements of the space.
- There are three approaches to passive systems:
 - Direct Gain
 - Indirect Gain
 - Isolated gain
- The goal of all passive solar heating systems is to capture the sun's heat

Solar Heating Proof Of Concept Experiment:

Solar Heating Proof-of-concept Experiment for a Public School Building Glen L. Merrill, 1975 The application of solar energy for heating a building is becoming increasingly more attractive as fuel prices increase and the supplies diminish During cold weather buildings in the Northern states which are heated by gas on a demand basis must shift to hard to obtain alternate fuels or pay a high gas rate These buildings are ideal candidates for supplemental heat supplied by solar powered systems The program described in this report demonstrates the ability of solar collectors to supplement the heating and hot water requirements of North View Junior High School in suburban Minneapolis The program is obtaining engineering data which may be used to improve collector performance and system performance or design In addition data are being compiled which may be used to define investment requirements for similar installations The program is also helping to determine community acceptance of solar heated school buildings In January 1974 the Systems and Research Center of Honeywell Inc under contract to the National Science Foundation embarked on a program to design erect and test a 5000 square foot solar energy system Results and conclusions to date are presented in this report The report discusses in detail the collector design system design system operation and system performance Testing at the site is continuing on a day by day basis to obtain additional data on system performance and benefits
