The Rise and Fall of American Art, 1940s-1980s Catherine Dossin, 2016-03-03 In *The Rise and Fall of American Art 1940s 1980s* Catherine Dossin challenges the now mythic perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall a position of power that brought the city prestige money and historical recognition Dossin reconstructs the concrete factors that led to the shift of international attention from Paris to New York in the 1950s and documents how peripheries such as Italy Belgium and West Germany exerted a decisive influence on this displacement of power As the US economy sank into recession in the 1970s however American artists and dealers became increasingly dependent on the support of Western Europeans and cities like Cologne and Turin emerged as major commercial and artistic hubs a development that enabled European artists to return to the forefront of the international art scene in the 1980s Dossin analyses in detail these changing distributions of geopolitical and symbolic power in the Western art worlds a story that spans two continents forty years and hundreds of actors Her transnational and interdisciplinary study provides an original and welcome supplement to more traditional formal and national readings of the period **Rogues'**

Gallery Philip Hook, 2017-01-26 Philip Hook takes the lid off the world of art dealing to reveal the brilliance cunning greed and daring of its practitioners In a richly anecdotal narrative he describes the rise and occasional fall of the extraordinary men and women who over the centuries have made it their business to sell art to kings merchants nobles entrepreneurs and museums From its beginnings in Antwerp where paintings were sometimes sold by weight to the rich hauteur of the contemporary gallery in London Paris and New York art dealing has been about identifying what is intangible but infinitely desirable and then finding clients for whom it is irresistible Those who have purveyed art for a living range from tailors spies and the occasional anarchist to scholars aristocrats merchants and connoisseurs each variously motivated by greed belief in their own vision of art and its history or simply the will to win The cast of characters includes Paul Durand Ruel the Impressionists champion Herwath Walden who first brought Modernism into the limelight Daniel Henry Kahnweiler high priest of Cubism Leo Castelli dealer midwife to Abstract Expressionism and Pop Art and Peter Wilson the charismatic Sotheby's chairman who made the auction room theatre Philip Hook's history is one of human folly greed and duplicity interspersed with ingenuity inspiration and acts of heroism *Rogues Gallery* is learned witty and irresistibly readable

Criminality Christopher Harding,Jennifer Edwards,2016-04-08 Anti competitive business cartels engaging in practices such as price fixing market sharing bid rigging and restrictions on output are now subject to strong official censure and rigorous legal control in a large number of jurisdictions across the world The longstanding condemnation under the US Sherman Act of 1890 has been taken up although in a rather different form during the last thirty years in the EC EU and in European national jurisdictions in particular but also in a range of countries outside North America and Europe Legal control has not only extended geographically but has intensified as a number of jurisdictions have moved beyond administrative regulation and penalties to embrace enforcement through civil liability and most significantly in terms of policy and rhetoric the methods of criminal law It is therefore timely to consider critically this development of legal control and assess its achievement to date and its future prospects But such an exercise requires an understanding of the reasons and need for such regulation based on a clear appreciation of the nature and extent of the economic and social malaise which is its subject What more exactly are such business cartels why do they come into existence and persist why are they regarded as being so bad and what are the objectives within this increasingly complex and multi level phenomenon of legal control By seeking to answer such fundamental questions this book sets a research agenda for a pathology aetiology and criminology of business cartels and probes more accurately their nature operation endurance and perceived delinquency
