Abstract 1984 High Pressure Materials Properties: Magnetic Properties of Oxides Under Pressure

Yoshiyuki Kawazoe, Takeshi Kanomata, Ryunosuke Naito, 2023-08-14 The subject of this supplement to Landolt Börnstein IV 22 Series is to present both the numerical and graphical data on the various magnetic properties of materials under pressure Data for transition metal binary oxides M_nO_n M transition metals O oxygen m n 1 15 MXO M transition metals X F Cl Br O oxygen and MM On M transition metals M transition metals or non transition metal elements O oxygen n 2 2 5 3 ternary oxides are presented As well known the data compiling principle in the Landolt Börnstein series is to choose the best reliable values from many available experimental data The present compilation is done according to this principle **Compounds and Alloys Under High Pressure** E.Yu Tonkov, 2022 This is the first book to classify and systematize the available data on the behavior of binary alloys under high pressure Despite the fact that there is a strong correlation between temperature composition T C phase diagrams at normal pressure and three dimensional temperature composition pressure T C P diagrams many material scientists seldom refer to the T C P diagrams just as many high pressure researchers often ignore the data obtained at normal pressure This book aims to bridge the gap between data obtained at high pressure and that obtained at normal pressure The most recent research covers not only elements and stoichiometric compounds but also binary ternary and multicomponent alloys and so this book covers an extended range of substances The properties of 890 binary systems and a further 1153 pseudobinary and ternary systems are summarized and accompanied by an extensive bibliography The data includes information on the solubility of components in solid solutions melting and first and second order phase transformations in alloys and stoichiometric compounds **Science and Technology of High Pressure** Murli H. Manghnani, W. J. Nellis, Malcolm F. Nicol, 2000 These books presents a wide spectrum of research and development activities in the field of High Pressure Science and Technology These book provide comprehensive and interdisciplinary descriptions of recent research accomplishments in the biological chemical Earth materials physical physiological and related sciences **Hydrogen Materials Science and Chemistry of Metal Hydrides** Michael D. Hampton, Dmitry V. Schur, Svetlana Yu. Zagayachenko, V.I. Trefilov, 2012-12-06 In September 1999 with the generous support of NATO scientists from 18 different nations gathered in Katsiveli Yalta Ukraine at the NATO Advanced Research Workshop on Hydrogen Materials Science and Chemistry of Metal Hydrides to present their research and to discuss world energy problems and possible solutions interactions of hydrogen with materials the role of hydrogen in materials science and the chemistry of metal hydrides High level and highly professional presentations were accompanied by a great deal of discussion and debate of the issues from both fundamental and global perspectives The result was a large number of new collaborations new directions and better understanding of energy and materials issues The research presented at this meeting can be found in

this volume These papers range from global perspectives such as the new vision of energy and how hydrogen fits into that future to reviews such as a look at nickel hydride over the last 40 years to very specific current research A large number of papers are included on hydrogen and materials These papers include articles on properties such as superconductivity diffusion EMF magnetic properties physico chemical properties phase composition and permeability as a result of the interaction with or incorporation of hydrogen Also included are papers discussing the use of hydrogen as a processing or alloying agent The use of hydrogen in the synthesis of battery electrode materials composite materials and alloys is also presented

High-Temperature and High Pressure Crystal Chemistry Robert M. Hazen, Robert T. Downs, 2018-12-17
