Solids And Liquids Conveying Systems Process Equipment Series Vol 4:

Handbook of Food Processing Equipment George Saravacos, Athanasios E. Kostaropoulos, 2015-12-29 This text covers the design of food processing equipment based on key unit operations such as heating cooling and drying In addition mechanical processing operations such as separations transport storage and packaging of food materials as well as an introduction to food processes and food processing plants are discussed Handbook of Food Processing Equipment is an essential reference for food engineers and food technologists working in the food process industries as well as for designers of process plants The book also serves as a basic reference for food process engineering students The chapters cover engineering and economic issues for all important steps in food processing This research is based on the physical properties of food the analytical expressions of transport phenomena and the description of typical equipment used in food processing Illustrations that explain the structure and operation of industrial food processing equipment are presented style font size 13

3333330154419px The materials of construction and fabrication of food processing equipment are covered here as well as the selection of the appropriate equipment for various food processing operations Mechanical processing equipment such as size reduction size enlargement homogenization and mixing are discussed Mechanical separations equipment such as filters centrifuges presses and solids air systems plus equipment for industrial food processing such as heat transfer evaporation dehydration refrigeration freezing thermal processing and dehydration are presented Equipment for novel food processes such as high pressure processing are discussed The appendices include conversion of units selected thermophysical properties plant utilities and an extensive list of manufacturers and suppliers of food equipment **Food Process**

Engineering Operations George D. Saravacos, Zacharias B. Maroulis, 2011-04-11 A unique and interdisciplinary field food processing must meet basic process engineering considerations such as material and energy balances as well as the more specialized requirements of food acceptance human nutrition and food safety Food engineering therefore is a field of major concern to university departments of food science and chemical and biological engineering as well as engineers and scientists working in various food processing industries Part of the notable CRC Press Contemporary Food Engineering series Food Process Engineering Operations focuses on the application of chemical engineering unit operations to the handling processing packaging and distribution of food products Chapters 1 through 5 open the text with a review of the fundamentals of process engineering and food processing technology with typical examples of food process applications The body of the book then covers food process engineering operations in detail including theory process equipment engineering operations and application examples and problems Based on the authors long teaching and research experience both in the US and Greece this highly accessible textbook employs simple diagrams to illustrate the mechanism of each operation and the main components of the process equipment It uses simplified calculations requiring only elementary calculus and offers realistic values of food engineering properties taken from the published literature and the authors experience The appendix

contains useful engineering data for process calculations such as steam tables engineering properties engineering diagrams and suppliers of process equipment Designed as a one or two semester textbook for food science students Food Process Engineering Operations examines the applications of process engineering fundamentals to food processing technology making it an important reference for students of chemical and biological engineering interested in food engineering and for scientists engineers and technologists working in food processing industries *Solids and Liquids Conveying Systems* J.
