Assignment 1.1 Multiple-choice questions

1. Answer: (a)

Answers (b) through (d) have elements of relevance but any set of GAAP (i.e., answer (a)) is a compromise between the interests described in b, c and d. Answer (e) is absolutely wrong, as reporting has nothing to do with tax regulations.

2. Answer: (d).

The purpose of the financial statements is to inform the user so they can understand the business model of the firm and how the wealth was created during the last period. The financial statements also describe both the resources and obligations and how the cash flows from various sources were used to improve the wealth creation potential.

Answer (a) is tempting as such an objective fits the purpose of the balance sheet, however 'Financial reporting' also includes the income statement and the statement of cash flows. Answer (b) cannot apply as reporting can only be about the past. However it must be acknowledged that many attempts have been made, by a variety of regulatory authorities, to request that managers provide financial statement users with 'forecasts'. The technical difficulties pertaining to forecasting and the required confidentiality of strategic decisions make the public provision of forecasts an impossible task. Answer (c) is wrong since financial reporting cannot assume how the financial markets will interpret the facts reported and the risks perceived by investors, thus financial reporting does not refer to market value of the firm.

3. Answer: (c).

The text of the answer is self-explanatory. Each business model generates a different cash-to-cash cycle, thus none of the mentioned 'authorities' have the ability to define the operating cycle of a business firm.

4. Answer: (b).
