Some Modern Tendencies In The Law

Samuel Williston

Some Modern Tendencies In The Law:

Some Modern Tendencies in the Law Samuel Williston, 1929 *Some Modern Tendencies in the Law* Samuel Williston, 1929 *The American Mind* Henry Steele Commager, 1950-01-01 An analysis of the political and social thought prevalent in America from 1880 to 1940 **International Relations in a Changing World**, 1977-08-23 Monographic compilation of essays on international relations includes contributions on research and teaching of international relations focusing on new dimensions of conflict new international economic order maritime law and the role of UN foreign investment inflation international law international economic relations etc References after each paper Festschrift institut universitaire de hautes etudes internationales 50th anniversary 1927 1977 **Modern Trends in Islamic Theological Discourse in 20th Century Indonesia** Fauzan Saleh, 2001-12-01 Aiming to trace the development of Islamic theological discourse in Indonesia from the early 1900s to the end of the 20th century the author focusses on how modernist Muslims have constructed their theological thought throughout the century which in turn reflects their religious understanding in response to the particular demands of their age The theological thought constructed so far signifies a continuum of progress developing from one stage to the next Implicitly this progress also indicates the improvement of Indonesian Muslims understanding of their own religion which may suggest the betterment of their commitment to doctrinal beliefs and religious practices Therefore this study will also examine the ways in which Indonesian Islam noticeably grows more orthodox through these forms of religious commitment Drawing upon an Indonesian term the growth of orthodox Islam is known as the santri cultural expansion which has been characterized by the vertical and horizontal mobility of devout Muslims in political cultural and economic enterprises A discussion of the theological thought underlying that santri cultural expansion is also included The Common Law Tradition George Liebmann, 2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback The Common Law Tradition is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn's commitment to empirical research underpinned his work on the Uniform Commercial Code Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history Davis was an energetic comparativist in his work on administrative law What distinguished these Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications The group's diversity the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from

today's legal scholars and make their ideas of continuing importance Roscoe Pound and Karl Llewellyn N. E. H. Hull, 1997

American legal history is traditionally viewed as a succession of discrete schools of thought or landmark court decisions not as the work of individuals. Such an approach however hardly does justice to the lives of two of the foremost teachers and theorists of American jurisprudence. In Roscoe Pound and Karl Llewellyn Searching for an American Jurisprudence N. E. H. Hull reconstructs the historical, cultural and intellectual context of the work of Pound and Llewellyn, bringing to light their private and public relationship as well as the diverse sources from psychology to plant ecology to Icelandic sagas they separately drew upon in making their contributions to the American legal tradition **Catalog of Copyright Entries. New Series** Library of Congress. Copyright Office, 1931 **Who's who in Law** J. C. Schwarz, 1937 **The Canon of American Legal Thought** David Kennedy, William W. Fisher III, 2018-06-05

This anthology presents for the first time full texts of the twenty most important works of American legal thought since 1890. Drawing on a course the editors teach at Harvard Law School, the book traces the rise and evolution of a distinctly American form of legal reasoning. These are the articles that have made these authors from Oliver Wendell Holmes Jr to Ronald Coase from Ronald Dworkin to Catherine MacKinnon among the most recognized names in American legal history. These authors proposed answers to the classic question: What does it mean to think like a lawyer, an American lawyer? Their answers differed but taken together they form a powerful brief for the existence of a distinct and powerful style of reasoning and of rulership. The legal mind is as often critical as constructive, however, and these texts form a canon of critical thinking, a toolbox for resisting and unravelling the arguments of the best legal minds. Each article is preceded by a short introduction highlighting the article's main ideas and situating it in the context of its author's broader intellectual projects, the scholarly debates of his or her time, and the reception the article received. Law students and their teachers will benefit from seeing these classic writings in full in the context of their original development. For lawyers, the collection will take them back to their best days in law school. All readers will be struck by the richness, the subtlety and the sophistication with which so many of what have become the clichés of everyday legal argument were originally formulated *Legal Essays in Tribute to Orrin Kip McMurray* Max Radin, A. M. Kidd, 1935 **The Civil Law Tradition, 3rd Edition** John Henry Merryman, Rogelio Pérez-Perdomo, 2007-05-21

Designed for the general reader and students of law, this is a concise history and analysis of the civil law tradition which is dominant in most of Europe, all of Latin America and many parts of Asia, Africa and the Middle East. This new edition deals with recent significant events such as the fall of the Soviet empire and the resulting precipitous decline of the socialist legal tradition and their significance for the civil law tradition. The book also incorporates the findings of recent important literature on the legal cultures of civil law countries *Loyola Law Journal*, 1923 Maritime law in the second half of the 20th century. Selected articles Jan Łopuski, 2008

The book contains a selection of articles written in the years 1962-2004 and published in English or French languages. They provide information and present views of the author on matters relating to the development and transformations which

occurred in maritime law in the second half of the 20th century Articles on Polish maritime law are presented separately from more numerous articles on international and transnational maritime law The articles compiled in this book illustrate the process of important changes and developments occurred in maritime law in the said period They indicate how problems created by the progress in the organisation of maritime trade technical innovations and political changes on the map of the world were identified considered and sometimes solved in the latter case the relevant article may have only a historical significance At the same time some traditional institutions of maritime law were changing their role and needed a reappraisal and revision
