Recognition of the Other Anton Froeyman, 2015-09-25 This book introduces a new way of looking at the writing of history Rather than as the production of knowledge or the telling of stories it sees writing history as an ethical existential and emotional engagement with the people from the past The conceptual and philosophical basis for this view is provided by the philosophy of Emmanuel Levinas In the first part the view is presented and contrasted with other competing views such as those of Hans Georg Gadamer and Michel Foucault In the second part the view is argued for most importantly by an in depth discussion of one specific tradition of history writing microhistory and a series of close readings of several classical works from the history of historiography The third part finally explores some of the methodological consequences of this view and applies it to a non academic way of dealing with the past namely historical performance practice in music The book features a foreword by Frank Ankersmit

Rindler,2012-12-06 In retrospect the first edition of this book now seems like a mere sketch for a book The present version is if not the final product at least a closer approximation to it The table of contents may show little change But that is simply because the original organization of the material has been found satisfactory Also the basic purpose of the book remains the same and that is to make relativity come alive conceptually I have always felt much sympathy with Richard Courant's maxim as reported and exemplified by Pascual Jordan that ideally proofs should be reached by comprehension rather than computation Where computations are necessary I have tried to make them as transparent as possible so as not to hinder the progress of comprehension Among the more obvious changes this edition contains a new section on Kruskal space another on the plane gravitational wave and a third on linearized general relativity it also contains many new exercises and two appendices one listing the curvature components for the diagonal metric in a little more generality than the old Dingle formulas and one synthesizing Maxwell's theory in tensor form But the most significant changes and additions have occurred throughout the text Many sections have been completely rewritten many arguments tightened many asides added and of course recent developments taken into account **Bulletin** ,1920 Soil Survey of ... Epistemicide Lucas Van Milders, 2024-11-05 How can the supremacy of the Western worldview be undone This book argues that the cause of social and political inequalities is above all the inequality of non Western worldviews when compared to that of the West Developing a critical theory and praxis for undoing epistemicide or in other words the murder of knowledge this book challenges the approach of the West and the rest Epistemicide refers specifically to the destruction of non Western forms of knowledge production that has facilitated the hegemony of Western centric epistemology or one that takes the West as a universalized perspective Rather than rehashing well known critiques of Western centrism this book develops the claim that alternative to the West vs Rest hierarchy worldviews are necessarily plural as each way of looking at the world reflects a particular perspective on the world Bringing this plurality of perspectives into a dialogue that celebrates difference and equality this book presents both a theoretical understanding of the world as hosting multiple worldviews and a practical conception of these worldviews as always already enacted within the world Undoing the dominance of the Western centric worldview entails looking at the different ways of being in the world that exist today and that reflect the prospect of a world in which many worlds are possible **The New and Complete American Encyclopædia; Or, Universal Dictionary of**
