Some Pigs:

Some Pigs Mark Shulman, 2014-04-30 Funny frolicsome whimsical little books about animals that do all the many things that boys and girls do or would like to do

The Objects of Thought Tim Crane, 2013-10-10 The Objects of Thought addresses the ancient question of how it is possible to think about what does not exist Tim Crane argues that the representation of the non-existent is a pervasive feature of our thought about the world and that we will not adequately understand thought's representational power intentionality unless we have understood the representation of the non-existent Intentionality is conceived by Crane in terms of the direction of the mind upon an object of thought or an intentional object Intentional objects are what we think about Some intentional objects exist and some do not Non-existence poses a problem because there seem to be truths about non-existent intentional objects but truths are answerable to reality and reality contains only what exists The proposed solution is to accept that there are some genuine truths about non-existent intentional objects but to hold that they must be reductively explained in terms of truths about what does exist The Objects of Thought offers both an original account of the nature of intentionality and a solution to the problem of thought about the non-existent

Wild Pigs C.A. Tisdell, 2013-10-22 Wild Pigs Environmental Pest or Economic Resource presents the beneficial and adverse effects on forests of wild pigs This book provides the formulation of policies for the management or control of wild pigs Organized into 10 chapters this book begins with an overview of relevant worldwide aspects of wild pigs and provides information about feral pigs in Australia This text then examines the difficulties of controlling wild pigs in agriculture and evaluates the economic damages to landholders Other chapters consider the methods of assessing the hunting value of a species for recreational purposes This book discusses as well the value of wild pigs in Australia and the relative significance of various species for hunting purposes in Australia The final chapter deals with the adverse effects of wild pigs on agriculture wildlife forestry and natural ecosystems This book is a valuable resource for agricultural economists agriculturalists conservationists foresters recreational hunters and pastoralists

The Woodhen Clifford Frith, 2013-06-12 This book tells the fascinating success story of saving the flightless Woodhen of Lord Howe Island This unique large rail, an iconic and highly endangered Australian bird, was at the very brink of extinction with just 15 individuals found in 1980 when bold and risky actions were taken to save it The book begins with the discovery and ecology of Lord Howe Island It then details the history of the Woodhen, its place among the rails, and their evolution of flightlessness the planning, implementation, and trials, tribulations, and successes of the captive breeding programme and the way in which the wild population recovered The ecology, behaviour, and breeding biology of this unique flightless island rail are also discussed The text is accompanied by numerous photographs and drawings This is a story of survival yet the bird remains highly endangered as it is under constant potential threat which could tip it over the brink and to extinction The Woodhen provides gripping insights into the potential for both losing and saving vertebrate species Winner of a 2014 Whitley Awards Certificate of Commendation for Historical

Mechanisms in the Pathogenesis of Enteric Diseases 2 Prem S. Paul, David H. Francis, 2012-12-06 This book Mechanisms in the Pathogenesis of Enteric Diseases 2 is an outcome of the Second International Rushmore Conference on Mechanisms in the Pathogenesis of Enteric Diseases held September 3D October 3 1998 in Rapid City South Dakota USA Its chapters represent many of the reviews and papers presented at the conference The meeting was organized by members of the North Central Regional Research Committee NC 62 a consortium of researchers of bovine and swine enteric diseases from land grant institutions supported by the United States Department of Agriculture The Rushmore Conferences were conceived as a forum for an interdisciplinary discussion of mechanisms of infectious enteric diseases It was intended that such a discussion would stimulate cross pollination of ideas and nurture synergistic collaborations among scientists who might otherwise not interact Enteric diseases are caused by widely divergent pathogens and parasites in broadly different settings and affect multiple organ systems Some enteric diseases affect a single species while others may affect multiple species perhaps including human beings Some enteric diseases were present in antiquity while others have recently emerged Knowledge regarding a particular disease or pathogen has frequently proven useful in understanding another disease or pathogen because common themes in pathogenesis exist As this knowledge base grows strategies in the prevention and control of various enteric diseases often converge Cross disciplinary discussions and collaborations facilitate growth of this knowledge base as well as development of tools for disease interdiction
