A Singing Ambivalence Victor R. Greene, 2004 A Singing Ambivalence undertakes a comprehensive examination of the ways in which nine immigrant groups Irish Germans Scandinavians Eastern European Jews Italians Poles Hungarians Chinese and Mexicans responded to their new lives in the United States through music Each group's songs reveal an abiding concern over leaving their loved ones and homeland and an anxiety about adjusting to the new society But accompanying these feelings was an excitement about the possibilities of becoming wealthy and about looking forward to a democratic and free society known and unknown origins that comment on the problems immigrants faced and reveals the wide range of responses they made to the radical changes in their new lives in America His selection of lyrics provides useful capsules of expression that clarify the ways in which immigrants defined themselves and staked out their claims for acceptance in American society But whatever their common and specific themes they reveal an ambivalence over their coming to America and a pessimism about achieving their goals the United States while at the same time conveying from an aesthetic viewpoint how immigrants expressed their hopes and difficulties through a unique medium song This is an important volume that will be welcomed by scholars of music and U S immigration history

Making Ireland Modern Enda Delaney, 2025-10-02 A provocative and original reinterpretation of modern Irish history There is a widespread misconception that Ireland became modern much later than its neighbours in the 1960s and 1970s This is grounded in several enduring stereotypes and caricatures of Ireland as a timeless and unchanging land of saints and scholars of its society and culture in the long nineteenth century as puritanical regressive or archaic of Gaelic language and culture as backward or inward looking in contrast to a modern English counterpart and of the island as natural and rural in the face of the urban and technological progress of modernity Drawing on an extensive range of sources from poetry and novels to contemporary historical documents acclaimed historian Enda Delaney here offers a reinterpretation of Ireland s encounter with modernity that corrects these stereotypes By situating the island s history between 1780 and 1916 within its broader European global and colonial contexts he demonstrates that Ireland s pathway to modernity was not inevitable belated or uni

directional over a complex and centuries long process it was made modern and in its own distinctive way This was related to but distinct from Ireland's complicated colonial relationship with Britain and played out in the broader contexts of globalisation and the rise of capitalism And at the heart of this history are the Irish people themselves both those who lived on the island and the millions of those who left during this period and made their lives in Britain America Australia and beyond who made sense of modernity in a variety of conflicting ways and in so doing sought to shape their own destinies and adapt the old ways of doing things in the face of relentless waves of progress Changes in values consciousness and beliefs interacted with broader social political and cultural revolutions to create a distinctive experience of becoming modern The result is a bold and wide ranging new history of modern Ireland that restores agency to those who lived and made its history raising important and timely questions about modernity globalisation modern history and post colonialism
