Imagination in Modern African Literature and Cinema Maik Nwosu, 2016-02-05 This book is a seminal study that significantly expands the interdisciplinary discourse on African literature and cinema by exploring Africa's under-visited carnivalesque poetics of laughter Focusing on modern African literature as well as contemporary African cinema particularly the direct-to-video Nigerian film industry known as Nollywood the book examines the often neglected aesthetics of the African comic imagination In modern African literature which sometimes creatively traces a path back to African folklore and in Nollywood with its aesthetic relationship to Onitsha Market Literature the pertinent styles range from comic simplicitas to comic magnitude with the facilitation of language characterization and plot by a poetics of laughter or lightness as an important aspect of style The poetics at work is substantially carnivalesque a comic preference or tendency that is attributable in different contexts to a purposeful comic sensibility or an unstructured but ingrained or virtual comic mode In the best instances of this comic vision the characteristic laughter or lightness can facilitate a revaluation or reappreciation of the world either because of the aesthetic structure of signification or the consequent chain of signification This referentiality or progressive signification is an important aspect of the poetics of laughter as the African comic imagination variously reflects across genres both the festival character of comedy and its pedagogical value This book marks an important contribution to African literature postcolonial literature world literature comic imagination poetics critical theory and African cinema

Mapping the Academic Debate Johannes Duschka, Christoph Kleine, Monika Wohlrab-Sahr, Florian Zemmin, 2024-12-16 This volume maps the international academic debate on secularity It places seminal contributions from within Western academia alongside less well-known texts from various parts of the world in several cases this is the first time that they have been translated into English The volume demonstrates that the academic debate on secularity was and is a global debate with contributions from many regions The collected texts relate to each other either directly or indirectly by referring to similar arguments whether reinforcing or criticising them and thus create a discourse When speaking of global

secularity we therefore do not insinuate a uniform world secularity resulting from the alleged global diffusion of Western norms ideas and concepts It is rather a web of relations that is constituted via various different references These references are not evenly distributed the development in the West is often the point of reference to which positions from other regions relate to which they connect or from which they distance themselves But the references are not completely unidirectional We also present texts from Europe that underline the multidirectionality of the process even early on Thereby the volume offers the reader the material with which to trace these global exchanges and references

Singing the Law Peter Leman,2020-04-18 Singing the Law is about the legal lives and afterlives of oral cultures in East Africa particularly as they appear within the pages of written literatures during the colonial and postcolonial periods In examining these cultures this book begins with an analysis of the cultural narratives of time and modernity that formed the foundations of British colonial law Recognizing the contradictory nature of these narratives i e both promoting and retreating from the Euro centric ideal of temporal progress enables us to make sense of the many representations of and experiments with non linear open ended and otherwise experimental temporalities that we find in works of East African literature that take colonial law as a subject or point of critique Many of these works furthermore consciously appropriate orature as an expressive form with legal authority This affords them the capacity to challenge the narrative foundations of colonial law and its postcolonial residues and offer alternative models of temporality and modernity that give rise in turn to alternative forms of legality East Africa s oral jurisprudence ultimately has implications not only for our understanding of law and literature in colonial and postcolonial contexts but more broadly for our understanding of how the global south has shaped modern law as we know and experience it today
