The Mystery Of Time Humanitys Quest For Order And Measure:

The Mystery of Time John Langone, 2000 Chronicles a visual journey through humanity s efforts to measure and quantify time from watching the geese fly south for the winter to modern cosmology

The Structure of Time Vyvyan Evans, 2004-03-05 One of the most enigmatic aspects of experience concerns time Since pre Socratic times scholars have speculated about the nature of time asking questions such as What is time Where does it come from Where does it go The central proposal of *The Structure of Time* is that time at base constitutes a phenomenologically real experience Drawing on findings in psychology neuroscience and utilising the perspective of cognitive linguistics this work argues that our experience of time may ultimately derive from perceptual processes which in turn enable us to perceive events As such temporal experience is a pre requisite for abilities such as event perception and comparison rather than an abstraction based on such phenomena The book represents an examination of the nature of temporal cognition with two foci i an investigation into pre conceptual temporal experience and ii an analysis of temporal structure at the conceptual level which derives from temporal experience

The Dynamics of Interconnections in Popular Culture(s) Ray B. Browne, Ben Urish, 2014-03-26 *The Dynamics of Interconnections in Popular Culture* s is an eclectic and free ranging collection of articles grounded in a combination of the social sciences with the populist humanities The collection is further unified by an approach that considers changes and linkages within and between cultural systems as evidenced through their respective popular cultures The key underlying assumption is that our collective popular expressions create an arena of global cultural exchange further precipitating new cultural adaptations expressions and connections The volume is divided into two sections The first consists of articles investigating theoretical and methodological approaches to the dynamics of history and cultural changes These include cultural anthropology history economics and sociology The second section is made up of explorations into a myriad of cultural practices and expressions that exemplify not only the wide diversity of popular cultures and their workings but also the interconnections between and within those cultural systems A wide variety of specific case studies are presented to evidence and support the more general points made in the previous section The collection demonstrates that the everyday lives of ordinary people while varying from culture to culture are unified through their expressions of shared humanity
