**History of Science, Magic and Belief** Steven P. Marrone,2014-12-11 A History of Science Magic and Belief is an exploration of the origins of modern society through the culture of the middle ages and early modern period By examining the intertwined paths of three different systems for interpreting the world it seeks to create a narrative which culminates in the birth of modernity It looks at the tensions and boundaries between science and magic throughout the middle ages and how they were affected by elite efforts to rationalise society often through religion The witch crazes of the sixteenth and seventeenth century are seen as a pivotal point and the emergence from these into social peace is deemed possible due to the Scientific Revolution and the politics of the early modern state This book is unique in drawing together the histories of science magic and religion It is thus an ideal book for those studying any or all of these topics and with its broad time frame it is also suitable for students of the history of Europe or Western civilisation in general      **A World of Light** May

Sarton,2014-07-22 This captivating book by May Sarton rejoices in friendship and family In A World of Light renowned poet and novelist May Sarton renders unforgettable portraits of the friends she considers family and the family she looks upon as friends From her father famed science historian George Sarton she learns that work is of the first importance Her mother Mabel an artist in her own right is her dearest friend Sarton also introduces us to fellow creative minds Elizabeth Bowen and Louise Brogan Swiss vigneron Marc Turian a New Hampshire painter named Quig and many others Sarton crosses oceans and continents as she chronicles the enduring connections she has made and how each has enriched her life Tender and passionate candid and evocative A World of Light is about what it means to be an artist and a human This ebook features an extended biography of May Sarton      **Concepts of Nature** Hans Ulrich Vogel,Günter Dux,2010-08-13 This book inspired by

the sociologist G nter Dux co edited by the historian Hans Ulrich Vogel and introduced by Mark Elvin is a collective intellectual masterpiece written by some of the world s leading scholars Its purpose is to illuminate premodern Chinese ways of thinking about Nature by comparing them with their counterpart traditions in Europe In so doing it also subtly reshapes our understanding of premodern European concepts of the natural world The domains covered principally include philosophy language poetry science and mathematics and their relations with society technology and politics By analyzing the frequent partial similarities between these great two cultural areas in the context of their overall contrasts it points the way for the first time to defining accurately the differences that have been critical for world history      **Rabelaisian Dialectic and the Platonic-Hermetic Tradition** George Mallary Masters,Timothy Carl McMasters,1969-01-01 In this study Professor Masters

looks beyond the few critical attempts that heretofore have analyzed only isolated aspects of Platonism and Hermetism in

Rabelaisian literature He examines the closely related themes of Platonism the Dionysian mysteries and the Hermetic sciences in Rabelais s work and concludes that Rabelais shared with the Platonic Hermetic tradition both its dialectic and perception of man s position in the universe In the perspective of Platonic dialectic Professor Masters analyzes Rabelaisian allegory symbolism and imagery as a play on appearance and reality Through the allegorical myths of Gargantua and Pantagruel Rabelais rejects the seemingly dichotomous extremes of materialism and ascetic spiritualism while his philosophy of Pantagruelism shows a positive acceptance of both the physical world and contemplative thought Through the symbolism of wine Rabelais manifests the Platonic ideal of Love Harmony Order on the literal level of conviviality in the philosophical dialogue of the symposium and in the intuitive dialectic of Socratic contemplation In Rabelais s view man can achieve self knowledge only through reasonable control and by actively establishing a balance with society nature and God The magus may diabolically use the sciences of astrology magic alchemy and the Cabala in an attempt to subject the world to his own will or he may achieve unity with himself and his total environment by restoring in himself the harmonious order he finds in the cosmos In an appendix Professor Masters examines the continuity of the several themes of the Platonic Hermetic tradition as they occur in the five books of the Rabelaisian corpus He concludes as two corollaries of the main thesis that their constant recurrence demonstrates the thematic unity of the five books and the authenticity of Book Five

**Philosophy and the Puzzles of Hamlet** Leon Harold Craig,2014-07-31 Shakespeare s famous play Hamlet has been the subject of more scholarly analysis and criticism than any other work of literature in human history For all of its generally acknowledged virtues however it has also been treated as problematic in a raft of ways In Philosophy and the Puzzles of Hamlet Leon Craig explains that the most oft cited problems and criticisms are actually solvable puzzles Through a close reading of the philosophical problems presented in Hamlet Craig attempts to provide solutions to these puzzles The posing of puzzles some more conspicuous others less so is fundamental to Shakespeare s philosophical method and purpose That is he has crafted his plays and Hamlet in particular so as to stimulate philosophical activity in the judicious as distinct from the unskillful readers By virtue of showing what so many critics treat as faults or flaws are actually intended to be interpretive challenges Craig aims to raise appreciation for the overall coherence of Hamlet that there is more logical rigor to its plot and psychological plausibility to its characterizations than is generally granted even by its professed admirers Philosophy and the Puzzles of Hamlet endeavors to make clear why Hamlet as a work of reason is far better than is generally recognized and proves its author to be not simply the premier poet and playwright he is already universally acknowledged to be but a philosopher in his own right

*Transnational Political Spaces* Mathias Albert,2009-10-05 From a decidedly multidisciplinary perspective the articles in Transnational Political Spaces address the notion that political space is no longer fully congruent with national borders Instead there are areas called transnational political spaces caused by factors such as migration and social transformation where policy occurs oblivious to national pressure Organized into three sections transnational actors

transnational spaces and critical encounters this volume explains how these spaces are formed and defined and how they can be traced and conceptualized Aus interdisziplinärer Perspektive gehen die Beiträge der Frage nach wie transnationale politische Räume hervorgebracht und gestaltet werden Dabei sind diese nicht rein territorial definiert Einbezogen werden Identitäten und Interaktionen die nationale Grenzen überschreiten wie sie etwa durch Migration entstehen *Democracy In Islam* Sayed Khatab, Gary D. Bouma, 2007-06-22 Challenging the view of Islamic extremists and critics of Islam this book explores the very topical issue of Islam's compatibility with democracy It examines principles of Islam's political theory and the notion of democracy therein the notion of democracy in medieval and modern Muslim thought Islam and human rights the contribution of Islamic legal ideas to European legal philosophy and law The book addresses the pressing need for a systematic show of an Islamic politics of human rights and democracy grounded in the Qur'an The West wonders about Islam and human rights and its own ability to incorporate Muslim minority communities Many Muslims also seek to find within Islam support source for democratic governance and human rights **The Rise of Fetal and Neonatal Physiology**

Lawrence D. Longo, 2018-02-01 This second edition offers an expanded and updated history of the field of fetal and neonatal development allowing readers to gain a comprehensive understanding of the biological aspects that contribute to the wellbeing or pathophysiology of newborns In this concluding opus of a long and prominent career as a clinical scientist Dr Longo has invited new contributions from noted colleagues with expertise in various fields to provide a historical perspective on the impact of how modern concepts emerged in the field of fetal physiology and contributed to the current attention paid to the fetal origins of diseases in adults In addition to new chapters on maternal physiology and complications during pregnancy others trace the history of the Society for Reproductive Investigation governmental funding of perinatal research and major initiatives to support training in the new discipline of maternal fetal medicine including the Reproductive Scientist Development program The extensive survey provided by the author who personally knew most of the pioneers in the field offers a unique guide for all clinical and basic scientists interested in the history of and future approaches to diagnosing and treating pathologies that represent the leading causes of neonatal mortality and far too often life long morbidity **English**

**almanacs, astrology and popular medicine, 1550-1700** Louise Hill-Curth, 2018-09-30 Early modern almanacs have received relatively little academic attention over the years despite being the first true form of British mass media While their major purpose was to provide annual information about the movements of the stars and the corresponding effects on Earth most contained a range of other material including advice on preventative and remedial medicine for humans and animals Based on the most extensive research to date into the relationship between the popular press early modern medical beliefs and practices this study argues that these cheap annual booklets played a major role in shaping contemporary medical beliefs and practices in early modern England Beginning with an overview of printed vernacular medical literature the book examines in depth the genre of almanacs their authors target and actual audiences It discusses the various types of medical

information and advice in almanacs preventative and remedial medicine for humans as well as non commercial and commercial medicines promoted in almanacs and the under explored topic of animal health care

**Christian Humanism** Alasdair A. MacDonald, Z.R.W.M. von Martels, Jan Veenstra, 2009-03-25 It is a misconception that Christianity and Humanism are in any way in conflict with each other The present book shows that through many centuries and especially in the Renaissance the two stood in a relation that was mutually complementary The contributions in this volume treat aspects and manifestations of this cultural symbiosis and they throw new light on authors and texts both more and less familiar The subject areas discussed include religion history philosophy literature and education The age of Renaissance and Reformation is the central focus but earlier and later periods are also featured The contributions comprise a Festschrift for Professor Arjo Vanderjagt whose work deals centrally with both Christianity and Humanism Contributors are Fokke Akkerman István P. Bejczy Alexander Broadie Christopher Burger Marcia L. Colish Albrecht Diem Stephen Gersh Berndt Hamm Volker Honemann Adrie van der Laan Alasdair A. Great Muslim Mathematicians Mohaini Mohamed, 2000 This book presents detailed accounts and analysis of the lives and world view of selected mathematicians of the Islamic period their place in the world of science the popularization of their lives and their contributions specifically in mathematics and astronomy

**The Arithmetic of Al-Uqlidisi** A.S. Saidan, 2012-12-06 The purpose of presenting this book to the scholarly world is twofold In the first place I wish to provide for the English reader a translation of the earliest extant Arabic work of Hindi arithmetic It shows this system at its earliest stages and the first steps in its development a subject not yet well known except for readers of some Arabic publications by the present writer This book is therefore of particular importance for students of the history of mathematical techniques The medieval author Al Uqlidisi was it seems not noticed by bibliographers neither was his work which lay hardly noticed by modern scholars until 1960 when I happened to see a microfilm copy of it in the Institute of Arabic Manuscripts in Cairo A steady labour immediately followed to make a comparative study of the text together with over twenty other texts some of them not yet known to scholars This pursuit resulted in i a doctoral degree awarded to me in 1966 by the University of Khartoum ii the publication of several texts in Arabic including the text here translated and iii the publication of several articles in Arabic and English on the history of arithmetic in the Middle Ages The second purpose of this book is to make the main results of my study available to the English reader

The Muslim Contribution to Mathematics Ali Abdullah Al-Daffa', 2020-09-10 This book first published in 1977 discusses the Muslim contribution to mathematics during the golden age of Muslim learning from the seventh to the thirteenth century It was during this period that Muslim culture exerted powerful economic political and religious influence over a large part of the civilised world The work of the Muslim scholars was by no means limited to religion business and

government They researched and extended the theoretical and applied science of the Greeks and Romans of an earlier era in ways that preserved and strengthened man's knowledge in these important fields Although the main object of this book is to trace the history of the Muslim contribution to mathematics during the European Dark Ages some effort is made to explain the progress of mathematical thought and its effects upon present day culture Certain Muslim mathematicians are mentioned because of the important nature of their ideas in the evolution of mathematical thinking during this earlier era Muslim mathematicians invented the present arithmetical decimal system and the fundamental operations connected with it addition subtraction multiplication division raising to a power and extracting the square root and the cubic root They also introduced the zero symbol to Western culture which simplified considerably the entire arithmetical system and its fundamental operations it is no exaggeration if it is said that this specific invention marks the turning point in the development of mathematics into a science

*Dodonaeus in Japan* Willy vande Walle, Kazuhiko Kasaya, 2001 This collection of essays is the outcome of an international symposium jointly organised by the International Research Center for Japanese Studies Kyoto and the Section of Japanese Studies of the Katholieke Universiteit Leuven in October 1998 It was the second in a series of three international symposia that the International Research Center for Japanese Studies organised in Europe in conjunction with a European partner The Leuven Symposium which went under the general title of Translations of Culture Culture of Translation actually consisted of two parallel sessions The first one was a workshop on Gender and Modernity in Japan The second one was devoted to a reflection on Translation and Adaptation in the Formulation of Modern Episteme A Reappraisal of Dodoens The essays in the present volume are the reworked and elaborated versions of the presentations made at the latter symposium It was clear that many of the issues one had to tackle had to do with translation and that translation was not a phenomenon limited to Japan but equally prominent in European cultural history nor limited to texts as such but involving broader cultural contexts as well The result was an investigation of Dodoens's Dodonaeus importance in Europe as well as in Japan through the prism of translation transposition adaptation etc defined as a moving force in cultural and social development and an indispensable lubricant in the process of functional differentiation The main concern was evidently Japan but the organisers deliberately opted for a perspective that kept a certain distance from boundaries Therefore experts in the field of Western herbals and botany were confronted with historians of early modern Japan

**Mediatic Shakespeare** Richard Cavell, 2025-09-23 Shakespeare produced his works during a media shift that was unmatched until our own Mediatic Shakespeare by media theorist Richard Cavell examines how Shakespeare's writing engaged with the cultural upheaval of an era shifting rapidly from spoken traditions towards print materials Cavell argues that print was an active cultural force that was in the process of reshaping Shakespeare's world and work Nostalgic for oral communality Shakespeare engaged guardedly with print producing a media dynamic that resonates throughout his work Drawing on media theorists from Marshall McLuhan to Friedrich Kittler and Bernhard Siegert Cavell traces Shakespeare's engagement

with the effects of a media ecology in which knowing and being were aggressively in flux Structured across four chapters  
Mediatic Shakespeare explores Shakespeare s media ecology the unsettling interfaces of orality and literacy the breakdown  
of the *sensus communis* and the implications for his work of the printing involution
