Turner,2006-05-17 Sociology is experiencing what can only be described as

hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory

The Knowledge Economy and Lifelong Learning

D.W. Livingstone, David Guile, 2012-09-07 This book presents some of the most trenchant critical analyses of the widespread claims for the recent emergence of a knowledge economy and the attendant need for greater lifelong learning The book contains two sections first general critiques of the limits of current notions of a knowledge economy and required adult learning in terms of historical comparisons socio political construction and current empirical evidence secondly specific challenges to presumed relations between work requirements and learning through case studies in diverse current workplaces that document richer learning processes than knowledge economy advocates intimate Many of the leading authors in the field are represented There are no other books to date that both critically assess the limits of the notion of the knowledge economy and examine closely the relation of workplace restructuring to lifelong learning beyond the confines of formal higher education and related educational policies This reader provides a distinctive overview for future studies of relations between work and learning in contemporary societies beyond caricatures of the knowledge economy The book should be of interest to students following undergraduate or postgraduate courses in most social sciences and education business and labour studies departments as well as to policy makers and the general public concerned about economic change and lifelong learning issues D W Livingstone is Canada Research Chair in Lifelong Learning and Work and Professor Emeritus at the Ontario Institute for Studies in Education University of Toronto David Guile is Professor of Education and Work at the Institute of Education University of London

Non-Medical Prescribing

Eleanor Bradley, Peter Nolan, 2008-04-24 The foundations of good prescribing are quality engagement with trusted healthcare staff access to knowledgeable and skilled personnel and full involvement in decisions about care

Beginning with a discussion of how prescribing practices have evolved this book then proceeds to outline how non medical prescribing is now implemented from the perspectives of nurses pharmacists and allied health professionals It explores the impact on practice and integrates the views and experiences of patients and service users as individuals assume responsibility for their own health and select from a range of treatment options The findings reported in this book describe the challenges posed by policy initiatives the implications they have for healthcare personnel and highlight areas in which further organisational change is required before the full impact of non medical prescribing will be felt *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1992 *The Making of the English Legal Profession* Richard L. Abel,1998 Analyzes barristers and solicitors as a legal profession in England and Wales *A History of Canadian Accounting Thought and Practice* George J. Murphy,2020-09-04 This book first published in 1993 focuses on the evolution of accounting institutions practices and standard setting in Canada Canada s federal system complicates the jurisdictional authority for accounting matters The Canadian constitution empowers the ten provinces to regulate the training and certification of accountants and each can incorporate organizations A great deal of effort has been made by accounting bodies on jurisdictional coordination and disputes and this book analyses how these systems have come to function in their present form *Theorising Professions* Edgar A Burns,2019-11-06 This book synthesises several decades of research to extend beyond the limitations of a traditional functionalist model offering a twenty first century theory of professions and professionalism for a new generation engaging in theorising and research It asserts nine innovative arguments drawing on major theorists such as Johnson Freidson Larson Weber Foucault and Bourdieu to achieve a global framing of professions Concepts of bundling and unbundling are used to explain changes happening to professions as they cease to be exclusive containers that fully control particular forms of knowledge Examining how professions are changing today reveals the ways in which expectations around expertise and goodness have altered for all stakeholders consumers regulators corporations and professions themselves Unbundled professions morph into new forms of professional work under new conditions technologies and social arrangements Professionals and policy makers interested in shaping the future of professions must recognise the potential impacts from an increasingly globalised digitalised and managerialised world and this book will be a key addition for scholars and practitioners alike *Social and Behavioral Aspects of Pharmaceutical Care* Nathaniel M. Rickles,Albert I. Wertheimer,Mickey C. Smith,2009-03-25 This thoroughly revised second edition of *Social and Behavioral Aspects of Pharmaceutical Care* offers a comprehensive overview of the social economic aspects of pharmaceutical care This new edition provides both the pharmacy student and practitioner with established principles from the social and behavioral sciences along with current findings and examples of cases and reports of applications of these principles Theoretical models and practical examples are included to elaborate the pharmacist s role in identifying patients non compliant behavior and managing drug related problems This valuable text includes clinical economic and humanistic considerations that are

essential to pharmacy students and practicing pharmacists This essential text also features a special focus on public health and the involvement of caregivers in facilitating behavioral change Social and Behavioral Aspects of Pharmaceutical Care Second Edition will help readers consider how organizations and social systems impact patient experiences with medications contributing to an improved system of pharmaceutical practice and care A Profession of One's Own Susan L. Smith-Cunnien,1998 This book documents organized medicine s communications to its members about chiropractic demonstrating how by fighting chiropractic organized medicine was serving itself and the profession focusing on unity in the face of factionalism demonstrating its superiority in the face of a doubting public and developing and maintaining its dominance in the face of bureaucratic and legislative challenges to that dominance Much has been written about how medicine s opposition to chiropractic spurred that profession to fight for its survival This book shows how medicine s opposition to chiropractic was just as important for the development of medicine
