## **Sociology Of Giving:**

Sociology of Giving Helmuth Berking, 1999-09-20 We all give and receive gifts But few of us reflect on the risks and uncertainties inherent to this form For example to give means to acquire power to effect a symbolic exchange to initiate ties and alliances to convey social messages to others and to classify our own status Gift giving is also a device to register honour and shame to show solidarity to equalize and to create intimacy This fascinating volume looks at the ambivalence of gift giving contemporary gift giving its motives occasions and its rules examines sacrifice food sharing and gift giving as those basic institutions upon which symbolic orders of traditional society rely and considers the historical invention of hospitality paving the way *Gift Giving* Cele Otnes, Richard Francis Beltramini, 1996 Gift Giving brings together 21 scholars from a variety of disciplines including consumer behavior communications and sociology who are dedicated to the understanding of what motivates gift selection presentation and incorporation of a gift into a person's life The text explores the role of values in gift exchange the influence of ethnic generational and subcultural differences in gift exchange how gifts to the self are manifested and new directions and topics in gift giving In these essays gift giving occasions are probed for the meanings that can be illuminated with respect to this pervasive yet not always positive phenomenon For anyone interested in gift giving behavior this volume should prove both enlightening and provocative **Moral Economy : Gift Giving in an Urban**

**Beyond Sociology's Tower of Babel** Bernard S. Phillips, 2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of

sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory

**Living Sociologically** Ronald N. Jacobs, Eleanor Townsley, 2025-02-15 Living Sociologically is built around a contemporary applied framework that is designed to help students find their place in a complex and contradictory social world Students who enroll in today's introductory sociology courses are already familiar with concepts such as inequality privilege conflict power and structure yet they do not realize how a sociological understanding of these concepts can help them to make sense of and enact change in their diverse social worlds Living Sociologically pairs central sociological concepts together Power and Resistance Inequality and Privilege Solidarity and Conflict Structure and Contingency and Global and Local giving students a framework and a set of tools to help them develop their sociological imaginations For example to understand the sociological and cultural meaning of wealth you also need to understand the sociological and cultural meaning of poverty These pairings illustrated and reinforced through abundant contemporary examples and case studies offer students relevant opportunities for thinking intersectionally and discovering the many ways in which sociological forces are at play in their lives
