Sociology Of Housework:

The Sociology of Housework Ann Oakley, 2018-10-31 In this ground breaking book acclaimed sociologist Ann Oakley undertook one of the first serious sociological studies to examine women's work in the home. She interviewed 40 urban housewives and analysed their perceptions of housework, their feelings of monotony and fragmentation, the length of their working week, the importance of standards and routines, and their attitudes to different household tasks. Most women, irrespective of social class, were dissatisfied with housework, an important finding which contrasted with prevailing views. Importantly too, she showed how the neglect of research on domestic work was linked to the inbuilt sexism of sociology. This classic book challenged the hitherto neglect of housework as a topic worthy of study and paved the way for the sociological study of many more aspects of women's lives.

Why Who Cleans Counts Shannon N. Davis, Theodore N. Greenstein, 2020-02-19 Every household has to perform housework, and researchers know a lot about what predicts who does which chores, drawing frequently from

theoretical explanations that highlight the importance of power dynamics This book moves beyond the existing scholarship by using quantitative nationally representative survey data to theorize about how power dynamics as reflected in housework performance help us understand broader family variations The authors investigate how knowing who cleans the house explains how households of differing forms demographics and compositions operate both cross sectionally and over the life course of the household

Families, Labour and Love Maureen Baker,2001 Annotation We think of family life as very personal but in fact it is shaped by influences well beyond our control Families Labour and Love identifies the ways in which family and personal life in three settler societies Australia New Zealand and Canada have been shaped by colonization immigration globalization demographic changes law and policy Baker shows that these three countries each a former colony developed similar family trends and similar family policies The family practices of indigenous people were largely overlooked as were those of recent immigrant groups Strongly gendered patterns of paid and unpaid work played a major role in family life Nevertheless local conditions also produced significant differences in family experiences among the three countries Containing numerous examples comparative data and textual sources Families Labour and Love provides a wide ranging analysis of the family that will appeal to students researchers and policy makers
