Principles of Sociology Alfred McClung Lee, 1972 *The Principles of Sociology* Herbert Spencer, 2015-06-11 Excerpt from *The Principles of Sociology* Vol 2 Inclusion of these proves impracticable On sundry of the following chapters when published in the Fortnightly Review a criticism passed by friends was that they were overweighted by illustrative facts I am conscious that there were grounds for this criticism and although I have in the course of a careful revision diminished in many cases the amount of evidence given adding to it however in other cases the defect may still be alleged That with a view to improved effect I have not suppressed a larger number of illustrations is due to the consideration that scientific proof rather than artistic merit is the end to be here achieved If sociological generalizations are to pass out of the stage of opinion into the stage of established truth it can only be through extensive accumulations of instances the inductions must be wide if the conclusions are to be accepted as valid Especially while there continues the belief that social phenomena are not the subject matter of a Science it is requisite that the correlations among them should be shown to hold in multitudinous cases Evidence furnished by various races in various parts of the world must be given before there can be rebutted the allegation that the inferences drawn are not true or are but partially true Indeed of social phenomena more than all other phenomena it must because of their complexity hold that only by comparisons of many examples can fundamental relations be distinguished from superficial relations In pursuance of an intention intimated in the preface to the first volume I have here adopted a method of reference to authorities cited which gives the reader the opportunity of consulting them if he wishes though his attention to them is not solicited About the Publisher Forgotten Books
