Sociology: Theories in Conflict R. Serge Denisoff, 1971 *Conflict Theory in Sociology* Than Than Aye, 2020-08-27
Akademische Arbeit aus dem Jahr 2012 im Fachbereich Soziologie Allgemeines und Grundlagen Sprache Deutsch Abstract
This paper examines different aspects of sociology and education conflict theory and stratification In the broadest perspective education refers to all efforts to impart knowledge and shape values hence it has essentially the same meaning as socialization However when sociologists speak of education they generally use a more specific meaning the deliberate process outside the family by which societies transmit knowledge values and norms to prepare young people for adult roles and to a lesser extent prepare adults for new roles This process acquires institutional status when these activities make instruction the central defining purpose are differentiated from other social realms and involve defined roles of teacher and learner Schools exemplify this type of institutionalization The central insight of the sociology of education is that schools are socially embedded institutions that are crucially shaped by their social environment and crucially shape it The field encompasses both micro and macro sociological concerns in diverse subfields such as stratification economic development socialization and the family organizations culture and the sociology of knowledge To understand modern society it is essential to understand the role of education Not only is education a primary agent of socialization and allocation modern societies have developed formidable ideologies that suggest that education should have this defining impact **Sociology: Theories in Conflict** R. The Nature and Types of Sociological Theory Don Martindale, 2013-11-05. First Published in 1998. This is Volume XI of twenty-two in a series on Social Theory and Methodology. Notions are widespread that sociological theory is either an industrious activity on the drawing boards of the architects of fantasy or a branch of esoterics operating in a shadowy realm of semi-darkness. The present study holds neither of these conceptions of sociological theory. The present study's function is to illuminate the difference between one theory and another. The power and reliability of a theory are not always evident all at once. A theory may have a power to explain what was not originally anticipated; it may also disclose the existence of problems it cannot explain.
