**The Provincial Deputation in Mexico** Nettie Lee

Benson, 2014-05-16 Mexico and the United States each have a constitution and a federal system of government. This fact has led many historians to assume that the Mexican system of government established in the 1820s is an imitation of the U.S. model. But it is not. In this interpretation of the independence movement, Nettie Lee Benson tells the true story of Mexico's transition from colonial status to a federal state. She traces the Mexican government's beginning to events in Spain in 1808-1810 when provincial juntas or deputations were established to oppose Napoleon's French rule and govern the country during the Spanish monarch's imprisonment. These provincial deputations proved so popular that ultimately they became the established form of government throughout the provinces of Spain and its New World dominions. It was the provincial deputation, not the United States federal system, that provided the model for the state legislative bodies that were eventually formed after Mexico won its independence from Spain in 1821. This finding, the result of years of painstaking archival research, strongly confirms the independence of Mexico's political development from U.S. influence. Its importance to a study of Mexican history cannot be overstated.

*The Central Republic in*

*Mexico, 1835-1846* Michael P. Costeloe, 2002-10-03 Much of the so-called Age of Santa Anna in the history of independent Mexico remains a mystery and no decade is less well understood than the years from 1835 to 1846. In 1834 the ruling elite of middle-class *hombres de bien* concluded that a highly centralised republican government was the only solution to the turmoil and factionalism that had characterised the new nation since its emancipation from Spain in 1821. The central republic was thus set up in 1835 but once again civil strife, economic stagnation and military coups prevailed until 1846 when a disastrous war with the United States began in which Mexico was to lose half of its national territory. This study explains the course of events and analyses why centralism failed, the issues and personalities involved and the underlying pressures of economic and social change.

**and Customs of Mexico** Peter Standish, Steven M. Bell, 2004-04-30 Mexico, with some 90 million people, holds a special place in Latin America. It is a large, complex hybrid, a bridge between North and South America, between the ancient and the modern, and between the developed and the developing worlds. Mexico's importance to the United States cannot be overstated. The two countries share historical, economic and cultural bonds that continue to evolve. This book offers students and general readers a deeper understanding of Mexico's dynamism, its wealth of history, institutions, religion, cultural output, leisure and social customs.

*France, Mexico and Informal Empire in Latin America, 1820-1867* Edward Shawcross, 2018-02-06 This book explores French imperialism in Latin America in the nineteenth century taking Mexico as a case study The standard narrative of nineteenth century imperialism in Latin America is one of US expansion and British informal influence However it was France not Britain which made the most concerted effort to counter US power through Louis Napoleon's military intervention in Mexico begun in 1862 which created an empire on the North American continent under the Habsburg Archduke Ferdinand Maximilian Despite its significance to French and Latin American history this French imperial project is invariably described as an illusion an adventure or a mirage This book challenges these conclusions and places the French intervention in Mexico within the context of informal empire It analyses French and Mexican ideas about monarchy in Latin America responses to US expansion and the development of anti Americanism and pan Latinism the consolidation of Mexican conservatism and finally the collaboration of some Mexican elites with French imperialism An important dimension of the relationship between Mexico and France explored in the book is the transatlantic and transnational context in which it developed where competing conceptions of Mexico and France as nations the role of Europe and the United States in the Americas and the idea of Latin America itself were challenged and debated
