Solomon Islands Project A Long Term Study Of Health Human Biology And Culture Change:

The Solomon Islands Project Jonathan Scott Friedlaender, John G. Rhoads, 1987 This volume summarizes the findings of the Harvard Solomon Islands medical anthropological expeditions of the late 1960s and early 1970s and presents the results of subsequent surveys of the same populations a decade later The Harvard expeditions amassed extensive anthropological genetic and health data on over 3 000 individuals living in eight varied groups in these southwest Pacific islands At the time the Solomons were only marginally affected by world culture and technological advances Particular strengths of this collection include genetic distance studies longitudinal studies in blood pressure change and associated changes in body build a prospective study of hepatitis B status and mortality and an overview of epidemiological trends with modernization

From Anthropometry to Genomics Jonathan Scott Friedlaender, 2009 Jonathan Friedlaender has devoted much of his professional life to studies of human population variation in Pacific Islanders His collaborator on this memoir of his life and experiences in the Pacific is Joanna Radin a young but remarkably knowledgeable historian of science currently conducting graduate studies at the University of Pennsylvania These two professionals weave a fascinating fabric of complex texture that incorporates the educational political governmental and research climate of the 1960s 1970s and 1980s with the trials and tribulations of a young researcher and academic trying to make his way in a highly competitive arena The book is much more than a series of recollections about one man s life rather it is a history of an important era in the development of anthropological genetics and the dramatic transition in this science that took place in the early 1980s Friedlaender s book should have appeal to a number of audiences students professional anthropologists and lay readers alike Jonathan Friedlaender s *Reflections* is a valuable addition to the historical record of this important science This is a worthwhile book to read for anyone with interests in the history of science or the history of a science From the Foreword by Professor Michael A Little Binghamton University On the Road of the Winds Patrick Vinton Kirch, 2002-03-15 Providing a synthesis of archaeological and historical anthropological knowledge of the indigenous cultures of the Pacific islands this text focuses on human ecology and island adaptations **Health Change in the Asia-Pacific Region** Ryutaro Ohtsuka, Stanley J.

Ulijaszek, 2007-05-24 The Asia Pacific region has seen great social environmental and economic change across the past century leading to dramatic changes in the health profiles of all populations represented in South East and East Asia Pacific Islands and the islands of Melanesia This volume considers evidence concerning prehistoric migration and colonial regional and global processes in the production of health change in the Asia Pacific region Notably it examines ways in which a health pattern dominated by under nutrition and infection has been displaced in many ways and is being displaced elsewhere by over nutrition and the degenerative diseases associated with it This book presents a cohesive view of the ways in which exchange relationships economic modernization migration and transnational linkages interact with changing rural subsistence ecologies to influence health patterns in this region Human Biology Sara Stinson, Barry Bogin, Dennis H.

O'Rourke,2012-03-19 This comprehensive introduction to the field of human biology covers all the major areas of the field genetic variation variation related to climate infectious and non infectious diseases aging growth nutrition and demography Written by four expert authors working in close collaboration this second edition has been thoroughly updated to provide undergraduate and graduate students with two new chapters one on race and culture and their ties to human biology and the other a concluding summary chapter highlighting the integration and intersection of the topics covered in the book
