replicable elsewhere Prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC it reiterates the current need to promote social responsibility Social responsibility and sustainable development are two different concepts whose integration over the years has led to significant advances in the way enterprises see and perceive their operations It is not only about policies or steps taken to meet legal requirements but is also about social equality and environmental accountability also bearing in mind the links with eco efficiency innovation and the health and wellbeing of workers According to ISO 26000 social responsibility is the responsibility of an organisation for the impacts of its decisions and activities on society and the environment through transparent and ethical behaviour that a contributes to sustainable development including health and the welfare of society b takes into account the expectations of stakeholders c is in compliance with applicable law and consistent with international norms of behaviour d is integrated throughout the organisation and practised in its relationships But even though the relations between social responsibility and sustainability are strong it is still necessary to encourage organisations to adhere to or at least follow the principles of sustainable development in their operations giving something back to the community As such there is a need for a better understanding of how social responsibility is related to sustainable development and of the identification of processes methods and tools that may help the integration of these two important elements There is also a real need to showcase successful examples of how to structure behaviour and institutional practice in line with the sustainability challenges we face today Chapter Reviewing the Stakeholder Value Creation Literature Towards a Sustainability Approach is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

**Some Aspects of Early Indian Society** Gian Chand Chauhan,2012 Some Aspects Of Early Indian Society is a comprehensive study of certain social institutions of early India based on literary and epigraphic traditions located between Vedic times to the 8th century A D It poses new questions on ticklish issues like the social thought of Kautilya Hindu sacraments graded early Indian society the question of the Sudras subjection of women Buddhist attitudes towards women Ashoka Dharma as gleaned from rock edicts feudal relationship and obligations between kings and vassal This study of Kautilya s social thought is probably the first of its kind to discover the essentials of Hindu social thought and its systematic presentation Some Aspects Of Early Indian Society is an attempt to trace the origin and growth of various

Hindu sacraments in early Indian society      **People, Planet and Profit** Samuel O. Idowu, Abubakar S. Kasum, 2016-05-13 It is no longer the case that it is only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of *People, Planet and Profit* believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners, insufficient attention has been paid to the end product of CSR in practice which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders including employees, customers, host communities, governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need, whether the CSR programmes being delivered are adequate, and about the relationship between the corporations' view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions in terms of economic progress and social and political advancement.
