Petöfi, Hannes Rieser, 2012-12-06 If we consider how theoretical operations belonging to the methodological inventory of linguistics are carried out i.e. the way linguistic theories are set up three main criteria suggest themselves for classifying them 1 Both nature and type of the aims of the scientific knowledge applied which allow to specify the epistemological interests as well as the theoretical impact constituting the purpose of linguistic operations 2 the nature of the intellectual procedures in connection with which a set of intersubjectively acceptable operations should guarantee that current postulates of the theory of science be maintained 3 the set of data serving as an empirical basis for the theories to be established on the one hand and as a correlate for the further development the testing and the evaluation of theories on the other hand It is to be considered a basic concept as well as a motive of current text linguistic research that due to the linguistic analysis of discourses a further development of linguistics has set in or is still to be achieved as regards the three criteria mentioned above Therefore if we want to estimate text linguistic approaches or concepts works methods or knowledge results we should take the view allowing for the general valuation of the linguistic discipline or one of its sub disciplines This should be done with respect to the contributions gathered in this volume as well

Structural Models and African Poetics Sunday O. Anozie, 2016-08-19 In this pioneering work first published in 1981 Sunday O Anozie examines the relevance of structuralism and semiology to literary criticism in general and to African poetics in particular Behind the growing body of African literature lies an immense reservoir of oral tradition for which the proper tools of analysis and interpretation have yet to be found This book represents the first comprehensive full scale exposition analysis and critique of structuralism by a non Western and non European scholar From an African viewpoint it examines the roles to be played by structuralism and post structuralism in the development of the general principles governing poetics and literary creativity in Africa This title will be of interest to students of literature and literary theory **Routledge Dictionary of Language and Linguistics** Hadumod Bussmann, 2006-02-20 The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language In over 2 500 entries the Dictionary provides an exhaustive survey of the key terminology and languages of more than 30 subdisciplines of linguistics With its term based

approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics

A Text-Linguistic Investigation into the Discourse Structure of James Mark E. Taylor, 2006-09-08 This study uncovers significant structuring techniques in James that prove to be beneficial in a number of ways First there exists a coherent discernible strategy in the letter as a whole Second significant uses of inclusio along with other transition techniques draw attention to important recurring themes Third the quotation of Lev 19 18 and echoes of the Shema Deut 6 occur in significant structural locations suggesting that the double love command in the Jesus tradition cf Mt 22 34 40 is a hermeneutical key to the interpretation of the letter The study begins with an introduction to the research problem and its significance for interpretation Chapter one summarizes and critiques past proposals of the structure of James Chapter two explains the text linguistic methodology employed in the study that is then applied in chapters three four and five Chapter six offers a proposed structure for the letter that consists of a double introduction 1 2 11 1 13 27 joined by an overlapping transition 1 12 a carefully crafted letter body 2 1 5 6 that is bracketed by a major inclusio 2 12 13 4 11 12 and a conclusion 5 7 20 LNTS

Discourse Description William C. Mann, Sandra A. Thompson, 1992 Discourse Description presents in one convenient volume a variety of approaches to text description that have been proposed in the linguistic literature in the last decade or so The book is organized to make it easy to understand and compare the various approaches Since all of the researchers are analyzing the same text their differences are readily seen The text they analyze is a letter mailed in bulk by a Washington based lobbying organization which is supported by contributions from donors Far from simply informing the readers the letter seeks to appeal to them on

many levels intellectual emotional and financial It is a fascinating study in how texts do their work Discourse Description is expected to serve both as a research document and as a case textbook for graduate and undergraduate courses in discourse and text analysis as well as a resource for text analysts An Historic Tongue Graham Nixon, John Honey, 2020-08-18 This volume first published in 1988 represents in its papers the wide ranging yet coherent linguistic interests of the late Barbara Strang 1925 1982 For her the history of English and its current state were two sides of the same coin and the principle theme of this collection is that neither one may be properly understood without invoking the other It is a real data collection in that its contributors share the view that the facts of language patiently gathered recorded and collated must govern the theory within which they are described and not vice versa This philosophy may be seen to operate in all the contributions and to result in a truly three dimensional picture of English data distribution temporal geographical situational and social and description This book will be of interest to students of English language and linguistics **Routledge Library Editions:**

The English Language Various, 2021-07-28 This set reissues 29 books on the English language originally published between 1932 and 2003 Together the volumes cover key topics within the larger subject of the English Language including grammar dialect and the history of English Written and edited by an international set of scholars particular volumes employ comparisons with other languages such as French and German whilst other volumes are devoted to specific English dialects such as Cockney and Canadian English or English in general This collection provides insight and perspective on various elements of the English language over a period of 70 years and demonstrates its enduring importance as a field of research

Theoretical Issues in Reading Comprehension Rand J. Spiro, Bertram C. Bruce, William F. Brewer, 2017-11-03 Research in cognitive psychology linguistics and artificial intelligence the three disciplines that have the most direct application to an understanding of the mental processes in reading is presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines **Current Trends in Textlinguistics** Wolfgang U. Dressler, 2014-11-21 No detailed description available for Current Trends in Textlinguistics Narrative Syntax and the Hebrew Bible Ellen van Wolde, 2021-08-30 Biblical Hebrew grammar was until recently concentrated on the morpho syntax within sentence boundaries In the past few decades text syntactic theories have been developed At the conference Narrative

Syntax and the Hebrew Bible Tilburg 1996 six eminent scholars presented both a paper on Hebrew syntax and a workshop in which Exodus 19 24 or 1 Samuel 1 was studied Both kinds of contributions are collected in this volume They tend to lead towards one conclusion traditional sentence grammar and text syntactic studies should not exclude but include each other The verb forms word order and other syntactic features need to be studied as functioning at more than one level A combination of a morpho syntactic study at the sentence level and a text syntactic approach is thus defended This publication has also been published in paperback please click here for details

The Grammar of Discourse Robert E. Longacre, 2013-11-21 In that The Anatomy of Speech Notions 1976 was the precursor to The Grammar of Discourse 1983 this revision embodies a third edition of some of the material that is found here The original intent of the 1976 volume was to construct a hierarchical arrangement of notional categories which find surface realization in the grammatical constructions of the various languages of the world The idea was to marshal the categories that every analyst regardless of theoretical bent had to take account of as cognitive entities The volume began with a couple of chapters on what was then popularly known as case grammar then expanded upward and downward to include other notional categories on other levels Chapters on discourse monologue and dialogue were buried in the center of the volume In the 1983 volume the chapters on monologue and dialogue discourse were moved to the fore of the book and the chapters on case grammar were made less prominent the volume was then renamed The Grammar of Discourse The current revision features more clearly than its predecessors the intersection of discourse and pragmatic concerns with grammatical structures on various levels It retains and expands much of the former material but includes new material reflecting current advances in such topics as salience clines for discourse rhetorical relations paragraph structures transitivity ergativity agency hierarchy and word order typologies

Text Analysis for the Social Sciences Carl W. Roberts, 2020-07-24 This book provides descriptions and illustrations of cutting edge text analysis methods for communication and marketing research cultural historical comparative and event analysis curriculum evaluation psychological diagnosis language development research and for any research in which statistical inferences are drawn from samples of texts Although the book is accessible to readers having no experience with content analysis the text analysis expert will find substantial new material in its pages In particular this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals The book's international and cross disciplinary content illustrates the breadth of quantitative text analysis applications These applications demonstrate the methods utility for international research as well as for practitioners from the fields of sociology political science journalism communication computer science marketing education and English This is an ecumenical collection that contains applications not only of the most recent semantic and network text analysis methods but also of the more traditional thematic method of text analysis In fact it is originally with this volume that these two relational approaches to text analysis are defined and contrasted with more traditional thematic

text analysis methods The emphasis here is on application The book's chapters provide guidance regarding the sorts of inferences that each method affords and up to date descriptions of the human and technological resources required to apply the methods Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers
