Close Encounters Andrew Davison, 2025-03-25 What would it look like to approach data with the care and attentiveness that we bring to a poem Andrew Davison proposes a new philosophy of data modeled on the affective and ethical qualities of the encounter between a reader and a literary text and demonstrates its significance for understanding urgent social and political issues In a cross disciplinary engagement with philosophical literary and political theoretical accounts of poetic experience Close Encounters challenges the philosophical underpinnings of dominant approaches to data analysis Instead Davison argues social scientists should treat their data with the same close attention and ethical responsibility that are accorded to literary texts In this view quantitative and qualitative data are not only collected coded or constructed they are entrusted to the care of their recipient Such attunement yields original insight into silenced erased and neglected subaltern dimensions of the data Davison demonstrates how this methodology provides fresh perspective on pressing topics such as immigration border politics torture war Trumpism violent political speech medical care criminal justice algorithmic governance and the COVID 19 pandemic Bringing together a strikingly original theorization of data with a rich array of examples Close Encounters shows why the skills and methods of literary inquiry are essential to ethically sensitive data analysis
