Spectral Classification And Multicolor Photometry:

Spectral Classification and Multicolour Photometry CH. Fehrenbach, B. E. Westerlund, 2013-11-21 Dr J Landi Dessy
Director of the Astronomical Observatory Cordoba Argentina invited the International Astronomical Union to hold a Symposium in Cordoba in connection with the celebration of the Centennial of the Cordoba Observatory the date of foundation is October 24 1871 He proposed that the Symposium should deal with Spectral Classification and Multicolour Photometry as seven years had elapsed since the Symposium No 24 in Saltsjöbaden and much development had occurred in the field The invitation and the proposal were accepted by the IAU and the Symposium was held in Villa Carlos Paz near Cordoba between October 18 and October 24 1971 It was attended by about 50 scientists representing Argentina Canada Chile Denmark France Germany Italy Mexico Sweden Switzerland U K U S A Vatican City State and Venezuela The Symposium was divided into four sessions 1 Classification of slit spectra 2 Classification of objective prism spectra 3 Photometric classification 4 Catalogues and documentation It was decided not to include problems of calibration of absolute magnitudes and temperatures of stars but to refer this to a separate symposium The contents of the present volume follow closely the programmes of the individual sessions of the Symposium All the participants at the Symposium appreciated the excellent hospitality of their Argentinian hosts and the efficient help given by the staff of the Cordoba Observatory

International Astronomical Union. Symposium on Spectral Classification and Multicolour Photometry, 1966 *Literature 1980, Part 1* Siegfried Böhme, Ute Esser, Professor Dr. Walter Fricke, Inge Heinrich, Wilfried Hofmann, Dietlinde Krahn, Dorothea Rosa, Dr. Lutz D. Schmadel, Gert Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user I 1980 some older Volume 27 contains literature published in 1980 and received before August literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouska Prague who surveyed journals and publications in Czech and supplied us with abstracts in English *Abundance Effects in Classification*
B. Hauck, P.C. Keenan, 1976-09-30 The general discussions of the roles of photometric and spectroscopic classification at Cordoba in 1971 IAU Symposium No 50 and of the calibration of classification indices at Geneva in 1972 IAU Symposium No

54 revealed clearly the steadily increasing importance of abundance parameters. The multiplicity of these however raised so many new problems that it was logical that the 1975 meeting at Lausanne should be concerned with ways in which differences in abundance affect both spectral types and photometric indices. Commissions 29 and 36 joined with Commission 45 in sponsoring this Symposium. Since the date of the meeting came shortly after the formal retirement of Professor William W. Morgan from the University of Chicago it was quickly agreed that this meeting should be dedicated to him in recognition of his unique contributions to spectral classification. In the opening paper of the Symposium Dr Bengt Stromgren has summarized these. To his remarks we should add only that it was about 1940 that Morgan first distinguished the group of G and K type stars with weak CN bands and metallic lines stars which have since been recognized as having the abundance of all metals relative to hydrogen much lower than in stars of the solar population. Spectra of two of these HD 81192, Boss 2527 and 8 Lep were later shown as examples of the group in the Yerkes Atlas of 1943.

Data Analytics and Management in Data Intensive Domains Alexander Elizarov, Boris Novikov, Sergey Stupnikov, 2020-07-13 This book constitutes the post conference proceedings of the 21st International Conference on Data Analytics and Management in Data Intensive Domains DAMDID RCDL 2019 held in Kazan, Russia, in October 2019. The 11 revised full papers presented together with four invited papers were carefully reviewed and selected from 52 submissions. The papers are organized in the following topical sections: advanced data analysis methods, data infrastructures and integrated information systems, models, ontologies and applications, data analysis in astronomy, information extraction from text, distributed computing, data science for education.

Byrne, M. Rodono, 2013-11-11 IAU Colloquium No 71 had its immediate origins in a small gathering of people interested in the optical and UV study of flare stars which took place during the 1979 Montreal General Assembly. We recognized that a fundamental change was taking place in the study of these objects. Space borne instruments especially IUE and Einstein and a new generation of ground based equipment were having a profound effect on the range of investigations it was possible to make. To extract maximum benefit from these new possibilities it would be necessary as never before to have good communication with colleagues in other disciplines for instance with atomic and solar physicists. Similarly studies of phenomena associated with the outer atmospheres of the late type stars could now hope to give significant insights into certain aspects of solar activity. So in view of the wide range of backgrounds of those participating the meeting had an unusually high proportion of invited reviews while most of the contributed papers were presented as posters. It is gratifying that in the short time since the meeting a good deal of correspondence has been received from participants remarking on the success of this format. Once the decision had been taken in principle to hold the meeting a very considerable amount of work fell on the two organizing committees viz the Scientific and Local Organizing Committees. The Scientific Organizing

Committee was chaired by D J Mullan and consisted of A D L. Weinberg, 1967
