Spectrum Auctions and Competition in Telecommunications Gerhard Illing, Ulrich Klüh, 2002 *Spectrum Auctions and Competition in Telecommunications* Gerhard Illing, Ulrich Klüh, 2003-12-23 Leading experts in industrial organization and auction theory examine the recent European telecommunication license auction experience In 2000 and 2001 several European countries carried out auctions for third generation technologies or universal mobile telephone services UMTS communication licenses These spectrum auctions inaugurated yet another era in an industry that has already been transformed by a combination of staggering technological innovation and substantial regulatory change Because of their spectacular but often puzzling outcomes these spectrum auctions attracted enormous attention and invited new research on the interplay of auctions industry dynamics and regulation This book collects essays on this topic by leading analysts of telecommunications and the European auction experience all but one presented at a November 2001 CESifo conference comments and responses are included as well to preserve some of the controversy and atmosphere of give and take at the conference The essays show the interconnectedness of two important and productive areas of modern economics auction theory and industrial organization Because spectrum auctions are embedded in a dynamic interaction of consumers firms legislation and regulation a multidimensional approach yields important insights The first essays discuss strategies of stimulating new competition and the complex interplay of the political process regulation and competition The later essays focus on specific spectrum auctions Combining the empirical data these auctions provide with recent advances in microeconomic theory they examine questions of auction design and efficiency and convincingly explain the enormous variation of revenues in different auctions

Wireless Services, Spectrum Auctions, and Competition in Modern Telecommunications Thomas James Duesterberg, Peter K. Pitsch, Hudson Institute, 1997

The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in

the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets [FCC Record](#) United States.
