Paul Virilio

Speed Politics:

Speed and Politics, new edition Paul Virilio, 2006-10-13 With this book Paul Virilio inaugurated the new science whose object of study is the dromocratic revolution Speed and Politics first published in France in 1977 is the matrix of Virilio's entire work Building on the works of Morand Marinetti and McLuhan Virilio presents a vision more radically political than that of any of his French contemporaries speed as the engine of destruction Speed and Politics presents a topological account of the entire history of humanity honing in on the technological advances made possible through the militarization of society Paralleling Heidegger's account of technology Virilio's vision sees speed not class or wealth as the primary force shaping civilization In this technical vitalism multiple projectiles inert fortresses and bunkers the metabolic bodies of soldiers transport vessels and now information and computer technology are launched in a permanent assault on the world and on human nature Written at a lightning fast pace Virilio's landmark book is a split second overwhelming look at how humanity's motivity has shaped the way we function today and what might come of it *The Speed Handbook* Enda Duffy, 2009-07-20 An argument that the sensation of speed made available to many through the mass produced automobile was the quintessential way that people experienced modernity *Politics on the Internet* Steve Buckler, David P. Dolowitz, 2005 This indispensable new text equips the reader with the key skills needed to cut through the mass of material the web offers and harness its real power Today's students and scholars need new coherent strategies to approach their interests and get the best out of information technology this superb book builds and strengthens these skills *Cyber Security and the Politics of Time* Tim Stevens, 2016 Explores how security communities think about time and how this shapes the politics of security in the information age **The Chief Phases of Pennsylvania Politics in the Jacksonian Period** Marguerite Gold Bartlett, 1919 **Paul Virilio** John Armitage, 2000-05-24 Paul Virilio is one of the most significant and stimulating French cultural theorists writing today Increasingly hailed as the archaeologist of the future Virilio is noted for his proclamation that the logic of ever increasing acceleration lies at the heart of the organization and transformation of the contemporary world The first book to afford a properly critical evaluation of Virilio's cultural theory it includes an interview with Virilio a recently translated example of his work and a select bibliography of his writings The commissioned contributions by leading cultural and social theorists examine Virilio's work from his early speculations on military and urban space to his current writings on dromology politics new communications technologies disappearance and the fallout from the information bomb New Directions in Criminological Theory Steve Hall, Simon Winlow, 2012-06-25 This edited collection brings together established global scholars and new thinkers to outline fresh concepts and theoretical perspectives for criminological research and analysis in the 21st century Criminologists from the UK USA Canada and Australia evaluate the current condition of criminological theory and present students and researchers with new and revised ideas from the realms of politics culture and subjectivity to unpack crime and violence in the precarious age of global neoliberalism These ideas range from the micro

realm of the personality disorder to the macro realm of global power crime Rejecting or modifying the orthodox notion that crime and harm are largely the products of criminalisation and control systems these scholars bring causes and conditions back into play in an eclectic yet thematic way that should inspire students and researchers to once again investigate the reasons why some individuals and groups elect to harm others rather than seek sociability This collection will inspire new criminologists to both look outside their discipline for new ideas to import and to create new ideas within their discipline to reinvigorate it and further strengthen its ability to explain the crimes and harms that we see around us today This book will be of particular interest to academics and both undergraduate and postgraduate students in the field of criminology especially to those looking for theoretical concepts and frameworks for dissertations theses and research reports

Re-Imagining a Politics of Life Leonie Ansems de Vries, 2014-10-30 The prominence and variety of global movements of resistance indicates that the idea of politics as governance is contested However the political canon continues to reinforce a narrow definition of politics according to liberal principles and practices This book develops a new theory of political life that includes and highlights the interconnectedness of forces of order disorder governance resistance violence and difference Using the concept of the milieu both a mechanism of governance and a force of difference and transformation this book stages an encounter between the modern political and international thought of Thomas Hobbes and Immanuel Kant and the contemporary philosophy of Michel Foucault and Gilles Deleuze The writings of Foucault and Deleuze will serve to explore and contextualize the milieu and will function to highlight the complex mobility and relationality of notions of politics life governance and resistance

Security, Technology and Global Politics Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general

Transnational Financial Crime

Nikos Passas, 2017-07-05 Financial crime affects virtually all areas of public policy and is increasingly transnational. The essays in this volume address both the theoretical and policy issues arising from financial crime and feature a wide variety of case studies and cover topics such as state revenue collection, criminal enterprises, money laundering, the use of new technologies and methods in financial crime, corruption, terrorism, proliferation of WMD, sanctions, third world debt, procurement, telecommunications, cyberspace, the defense industry, and intellectual property. Taken together, these essays form a must-read collection for scholars and students in law, finance, and criminology.
