conference in Pennsylvania in 1980 this is an updated collection of 14 well researched essays on the Southern African region The main focus is on the apartheid regime in South Africa and its economic military and political impact on the neighbouring states There is one article dealing specifically with Namibia John Seiler *South Africa in Namibia* p 165 189 but the contributions on SADC Southern Africa in the World System and South Africa's relations with Mozambique and Angola also throw light on questions highly relevant to the future of Namibia Eriksen Moorsom 1989 **International Finance:**

Theory and Policy in Africa Daniel Gbetnkom, 2012-01-26 It is now well known that there are close links between financial sector development and economic growth and in turn between economic growth and poverty reduction A well functioning financial sector that allocates finance to the best opportunities can contribute to a more diverse economy and a more equal society rewarding entrepreneurial newcomers and challenging an entrenched and sometimes corrupt economic and political

status quo However at first glance the international finance theory and policies would seem to have little relevance for Africa as there were built up in response to developments that took place far from Africa and whose direct impact on Africa was limited Nonetheless key components of the international finance functioning are very relevant for Africa The ongoing global financial and economic crises that are shaking the world have come as a stark reminder that African countries have a direct interest in global financial stability even though they may not be the main actors In this line economic fundamentals sound national macroeconomic and structural policies and a sound and properly regulated financial system are as critical as ever in Africa This volume explores the application of the basic theory and the policies of international financial transactions in Africa It contains six chapters on conceptual and policy oriented issues Analyses raise important questions and offers favorable counter arguments to the application of international finance theory after bringing to focus the relevance of certain themes in Africas inter state and intrastate policies *South Africa's Foreign Relations, 1961-1979 ,1980*
