Strategies For Success:

Strategies for Success among African-Americans and Afro-Caribbeans Chrystal Y. Grey, Thomas Janoski, 2017-12-18 How can African Americans and Afro Caribbeans from the former British colonies be so different in their approaches toward social mobility Chrystal Y Grey and Thomas Janoski state that this is because native blacks grow up as strangers in their own country and immigrants from the English speaking Caribbean are conversely part of the dominant group Unlike previous research that compares highly educated Afro Caribbeans to the broad range of African Americans this study holds social class constant by looking only at successful blacks in the upper middle class from both groups This book finds that African Americans pursue overachievement strategies of working much harder than others do while Afro Caribbeans follow an optimistic job strategy expecting promotions and success However African Americans are more likely to use confrontational strategies if their mobility is blocked The main cause of these differences is that Afro Caribbeans grow up in a system where they have many examples of black politicians and business leaders 35 90% of their countries are black and African Americans have fewer role models 12 14% of the United States are black Further the schooling system in Afro Caribbean countries does not label blacks as underachievers because the schools are almost entirely black A further problem that African Americans face is the resentment of a small but significant number of blacks who have little social mobility They accuse socially mobile African Americans of acting white which is a phenomenon that Afro Caribbeans almost never face and they call it an African American thing To demonstrate this difference Strategies for Success among African Americans and Afro Caribbeans does a historical comparative analysis of the differences between the black experience after slavery in the United States and Jamaica Trinidad and Tobago Guyana and St Kitts Nevis The authors interview fifty seven black people and find consistent differences between the US and Caribbean black citizens Using theories of symbolic interaction and resentment this work challenges previous studies that either claim that Afro Caribbeans are more motivated than African Americans or studies that show that controlling for class each group is more or less the same

Luisa Henrike Schäfer, 2016-03-21 Fully integrating sustainability into a corporate strategy has progressively become the ubiquitous norm However designing a credible effective sustainability strategy still appears to be a challenging task and lacking employee support frequently labels the strategies as insignificant public relations practices As the awareness for sustainability issues prevails the call for a substantial paradigm shift in corporate mindsets emerges For any sustainability strategy to be successful the affected employees need to be aligned and engaged behind it Human Resource Development HRD as proper training enabler for such strategies offers important voice and expertise to realize the true satisfaction of sustainability ambitions At the present time of globalization and due to the critical need to consider

environmental social and financial consequences of business operations the sustainability movement cannot be considered a passing trend Since HRD is expected to play a facilitative role in establishing corporate sustainability this work proposes theoretical approaches linking HRD with sustainability and corporate responsibility The empirical purpose of this study is to investigate the current engagement of HRD in the field examining one fundamental question Assuming that employees are key success factors for sustainability strategies how can HRD professionals and departments ensure that sustainable behavior will be part of all members of a company Drawing from qualitative expert interviews with senior HRD managers of large companies that declare explicit commitment to sustainability within different industries the evidence shows that their engagement still tends to be limited This research concludes with an argument for greater involvement of HRD in corporate sustainability endeavors and offers suggestions for research and practice towards this end
