United States. Congress. Office of Technology Assessment, **India's Strategic Future** Ross Babbage, Sandy Gordon, 2016-07-27 South Asia has inherited a volatile ethnic and social mix that generates powerful political unrest between the nations of the region Within this setting India continues its quest for regional great power status This volume asks whether India can continue to build on its military base and extend its strategic reach or whether the problems of a troubled nation and neighbourhood act as a restraint on these aspirations If it does eventually achieve these aims what kind of power is it likely to be *A Strategic Assessment of the Future of Water Utilities* Edward G. Means, 2006 Forty three 43 water professionals met to discuss and develop the ten top future trends and formulate the strategies to deal with each trend Nineteen trends are presented within this paper The top ten trends are described along with potential implications and coping strategies are Energy Drinking Water Industry Employment and Workforce Issues Political Environment Population and Demographic Trends Regulatory Trends Total Water Management Customer Expectations Information Technology Utility Finances Information Security The nine future trends identified and discussed are Automation Climate Change Health Trends Medical Trends Regionalization Trends Drinking Water Treatment Technology Issues Economic Trends Private Sector Participation Physical Security CD is included **Europe's Strategic Future** Sarah Raine, 2019-08-08 Europe has suffered a decade of crises with sovereign debt troubles leading to austerity policies that exacerbated divisions inside member states and between them Thereafter the Union was confronted with the challenges posed by a revanchist Russia in Ukraine and by a surge in migration from the Middle East and other conflict zones The June 2016 UK vote to leave the Union threatened

further damage to an institution that acknowledges it has failed to punch its weight in the spheres of foreign defence and security policy While that is a chronic shortcoming its impact is becoming more acute as economic power moves East and Europe can no longer count on the steadfast support and leadership of the United States The costs of Europe s failure to achieve strategic coherence and effect are steadily rising This Adelphi book addresses the consequences of Europe s multiple crises for its standing as a strategic actor acknowledging its unique character and capabilities It argues that strategic thought and action is belatedly being informed by the deteriorating security environment and that nascent initiatives have the potential to effect a step change There are grounds for cautious optimism visible in the success of stabilisation and counter piracy operations as well as coordinated diplomatic activity Also the continent s leading powers are becoming more pragmatic about how cooperation is organised within and beyond the Union These developments offer the possibility that Europe might meet its aspirations to be a strategic actor of consequence despite a long track record of disappointment and the still considerable obstacles that lie in its path
