Commercial companies and non governmental organisations NGOs are internationalising at an increasing pace Yet little is known about the management of NGOs during this process Indeed they have been neglected by comparison to the literature on companies This thesis draws on theories of how and why companies internationalise to determine whether the explanations they offer can be extended to cover NGOs It considers the driving forces experienced by NGOs the stages they pass through This was undertaken through a postal survey using results from 52 international NGOs from Europe and the US The findings were later considered in relation to four case studies of NGOs two relatively small NGOs which have internationalised slowly and two larger and faster NGOs to give practical examples and a wider insight into internationalisation The results indicate that for driving force theories to be applicable to NGOs they need to take into account NGOs strong internal motivation to meet needs the varying influence of drivers on different NGOs and the separate roles drivers play for NGOs For stage theories the results suggest that there are similarities and differences with companies and that Federations may follow a parallel route to other NGOs The results also suggest that NGO managers should pay critical attention to the range of driving forces both internal and external that apply to their organisation Managers should also be prepared for problems with their overseas branches before they reach the stage of being truly global NGOs however may be better suited to that stage than many companies      **Journal of Economic Literature** ,1993      *Small Firm Formation and Regional Economic Development* Mike Danson, 2002-09-26 Drawing on studies and expertise from around the world this book describes the transition from research to policy and covers the pre requisites to successful new firm formation policies At a time when a new firm formation is promoted by central and local government business development agencies and the private sector this book questions the economic dependence on small firms and explores the relevance of networking information and advice      **International Capital Budgeting** Adrian Buckley, 1996 An advanced level text which covers the concepts and practice of appraising international capital budgeting decisions it presents many pioneering ideas for the development of a logical appraisal framework      *What is Strategy, and Does it Matter?* Richard Whittington, 1993 Study of corporate strategy In this text the author identifies four basic theories of action in strategy the classical planning approach the efficiency driven evolutionary approach the craft like processural approach and the internationally sensitive systemic approach
