Strategies Of Transformation Toward A Muticultural Society:

Strategies of Transformation Toward a Multicultural Society David T. Abalos, 1996-03-11 How can the culturally diverse communities of America live justly and fruitfully together Not by assimilation into the dominant culture nor by fighting for the freedom to pursue our own self interest at the cost of our repressing both the wounds and the promising potential of our own cultural roots This book offers a theory and practice of transformation that shows especially through literature education and politics how we can create a multicultural society that liberates our being as a fulfillment of the story of democracy Perhaps for the first time in American history we are seeing the personal political historical and sacred faces of women people of color and all ethnic groups as they tell their stories It is this emerging scholarship that constitutes the new multicultural and feminine face of the story of democracy *The Latino Male* David T. Abalos, 2002 Abalos religious studies and sociology Seton Hall U presents a critique of archetypal roles of Latino males including the womanizer the macho and the patriarch As an alternative to these outdated and restrictive ways of living Abalos describes how Latino males are able to radically redefine themselves and create new transformational archetypes He goes on to discuss how Latino men can become agents of transformation in the family and the larger world c Book News Inc *Resources in Education* ,2000

Where We Live, Work and Play Patrick Novotny, 2000-08-30 Numerous studies have revealed that the poor disproportionately bear the burden of environmental problems in America today Issues range from higher levels of poisonous wastes carbon dioxide and ozone to greater than normal incidences of asthma and lead poisoning The environmental justice movement which has emerged in working class and low income African American and Latino communities since the early 1990s is an effort that is reinterpreting the definition of the environment as where we live work and play to connect new constituencies traditionally outside of the postwar environmental movement Novotny documents this expanding constituency through case studies of four community groups ranging from South Central Los Angeles to Louisiana Environmental racism is understood as yet another type of discrimination which results in a high incidence of environmental concerns in poorer communities due to what many activists see as discriminatory land use practices decisions by industry that intentionally locate hazardous wastes in these communities and the uneven enforcement of environmental regulations by federal state and local officials Community leaders have added environmental causes to their fight against unemployment impoverishment and substandard housing This study explores various attempts to put a halt to illegal practices and to broaden public awareness of the issues involved **La Comunidad Latina in the United States** David T. Abalos, 1998-05-26 La comunidad Latina the

fastest growing ethnic group in the United States has long been told that assimilation is the only way to succeed in American society This book challenges that generally accepted view and concludes instead that transformation as a way of life is the only viable option for the Latino community as a whole regardless of racial class regional or religious differences It highlights how in the everyday life of la comunidad Latina the members of the community can recognize the underlying ways of life the

stories and the patterns of relationships that cripple them and how to break with these ways of life stories and relationships to create fundamentally more loving and compassionate alternatives Along with all men and women Latinos and Latinas face four choices retaining a blind loyalty to a romanticized past assimilating violating each other or transforming their ethnic and racial group for the better This examination of the underlying sacred meaning of the stories of the Latino culture attempts to determine whether these stories are destructive or creative Now coming of age la comunidad Latina previously wounded by assimilation continues to tell its story in art literature history and religion so that the world may perhaps for the first time see its personal political historical and sacred faces The most important story now being lived is that of Latina women and Latino men who are making choices that will determine the ultimate meaning of a new Latino culture in this nation

Transforming Privacy Stefano Scoglio, 1998-02-18 Using an innovative history of the constitutional right to privacy and inspired by Emersonian Justices like Brandeis and Douglas this book rescues the meaning of privacy from prevalent liberal thinking by proposing a general theory of rights based on a spiritual ecological jurisprudence tradition at the heart of American law The right to privacy is a powerful yet often overlooked tradition whose main representatives are Justice Brandeis and Justice Douglas both of whom translated into concretely legal and political ideas the philosophy of American thinkers like Emerson and Thoreau In light of this historical understanding the major constitutional cases relating to privacy such as Griswold or Roe v Wade are given new interpretations Through a radical reinterpretation of Mill's philosophy of liberty and a comparison of that reinterpretation with the one of Brandeis this book proposes a new general theory of rights based on the valuation of privacy as a transformative context in which self knowledge can emerge giving birth to ethical and communal responsibility

Seton Hall University Dermot Quinn, 2023-02-10 Founded in 1856 by Bishop James Roosevelt Bayley of Newark Seton Hall University has played a large part in New Jersey and American Catholic life for nearly two centuries From its modest beginnings as a small college and seminary to its present position as a major national university it has always sought to provide a home for the mind the heart and the spirit In this vivid and elegantly written history Dermot Quinn examines how Seton Hall was able to develop as an institution while keeping faith with its founder's vision Looking at the men and women who made Seton Hall what it is today he paints a compelling picture of a university that has enjoyed its share of triumphs but has also suffered tragedy and loss He shows how it was established in an age of prejudice and transformed in the aftermath of war while exploring how it negotiated between a distinctly Roman Catholic identity and a mission to include Americans of all faiths Seton Hall University not only recounts the history of a great educational institution it also shares the personal stories of the people who shaped it and were shaped by it the presidents the priests the faculty the staff and of course the students

Thinking About Schools Aimee Howley, Craig Howley, 2012-11-12 As its title implies this book has a deceptively simple mission to prepare would be school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling It shows how theories can function as cognitive tools to be mastered carefully stored in one's intellectual toolbox and used to interpret and resolve real world problems Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well

grounded interpretations of events and their own responses to those events Key features of this exciting new text include the following Focus on Alternative Theories The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern day schooling The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real world problems Focus on Diversity Diversity is examined from a variety of viewpoints Chapter 6 looks at the cultural bases of leadership Chapter 7 at comparative and international contexts and Chapter 8 at gender and sexual orientation Illustrative Cases Each chapter contains a case with an embedded dilemma similar to those that real world administrators confront While illustrating the particular theoretical view presented in the chapter these cases are sufficiently complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory

Teaching Democracy by Being Democratic Ted Becker, Richard A. Couto, 1996-10-30 The best way to teach democracy has been the subject of an ongoing debate for 2 500 years Unlike most books about teaching democracy this one spends more time on how to teach democracy than the what and why of teaching democracy It punctures the irony of teaching democracy by lectures and superior teachers In its place this book provides a variety of illustrations for the teaching of democracy in an experiential and egalitarian fashion The introduction presents a theoretical and analytical framework of democracy and democratic pedagogy The six chapters cover topics such as structuring a democratic classroom democratic practices that empower students problem solving and community service that make the classroom a laboratory for democracy and university based programs of democratic alternatives that serve the community The volume s treatment of community organization students as collaborators personal empowerment the community of need and response and the democratic organization expresses its preference for direct democratic participation Postwar Academic Fiction K.

Womack, 2001-12-17 As a literary genre academic fiction has emerged in recent years as one of the most popular modes for satirizing the cultural conflicts and sociological nuances inherent in campus life Drawing upon recent insights in ethical criticism and moral philosophy *Postwar Academic Fiction* Satire Ethics Community offers new readings of fictional and nonfictional works by such figures as Kingsley Amis Vladimir Nabokov Joyce Carol Oates David Lodge David Mamet Ishmael Reed Sandra M Gilbert and Susan Gubar and Jane Smiley **Israel at the Polls 1999** Daniel J. Elazar, M. Ben Mollov, 2020-04-03 The 1999 Israeli elections focused on the character of the main political contenders for prime minister Binyamin Netanyahu and Ehud Barak Along with Barak s victory the Israeli public made important statements concerning the shape and direction of Israeli political culture with a hope of a centrist vision Leading Israeli political scientists discuss the

revival of the Israeli left and the increased strength of ethnic Sephardi Russian and Arab electorates They also examine the place of foreign policy media and other socio economic factors on the outcome of the election Innovations in Transformative Learning Beth Fisher-Yoshida,Kathy Dee Geller,Steven A. Schapiro,2009 This book addresses the disparity between transformative learning theory as espoused and practiced in the classrooms of the academy and its application beyond It articulates new models of transformative education that integrate transformative learning theory with other models of change and development The three editors and eleven contributors draw on both theory and practice to illustrate how transformative learning has been introduced to a variety of settings and cultures and synergistically integrated with theories of communication participatory action research and communities of inquiry and practice Organized around the themes of creating space for learning looking through the lenses of culture diversity and difference and animating awareness through the expressive and performative arts this collection will broaden awareness and aid scholars students and practitioners in using transformative learning as an approach to adult learning and social and organizational change in a range of settings

Rupert Clive Collister,2010 This book explores the concept that the reality which is created by the consciousness inherent in the Western worldview is exceptionally limiting and probably unsustainable After describing the contexts within which the book was written the author documents his personal journey in search of wholeness and meaning From his experience of this journey he suggests that the wisdom insight and praxis contained within what he describes as the meta narratives of Holism Indigenous cultures and Eastern traditions are manifestations of a holistic consciousness The author explores the concept that a shift to such a holistic consciousness is required in order to redress the imbalance that is evident in all humanity s relationships and he suggests that enabling such a shift in consciousness would have deep implications for the concepts and contexts of community adult learning meaningful work and sustainability **Social Transformation and Migration** S. Castles,D. Ozkul,M. Cubas,2015-02-27 This book examines theories and specific

experiences of international migration and social transformation with special reference to the effects of neo liberal globalization on four societies with vastly different historical and cultural characteristics South Korea Australia Turkey and Mexico *The Politics of Immigration. Is Germany Moving Towards a Multicultural Society?* Samuel Skipper, 2017 The topic of immigration is never simple Questions such as who belongs to society and how do you define national identity or what values are needed to maintain a coexisting society are extremely difficult to answer Global migration introduces unprecedented challenges for conceptualising the integration of immigrants On a European scale Germany can be said to represent the first destination for immigrants since its unification in 1989 On a global level Germany is the second largest immigrant receiving country after the United States Nevertheless only recently has Germany recognised and admitted that it is an ethnically and culturally diverse society Before the 1998 elections successive governments have always stuck to the maxim that Germany is not a country of immigration The infamous phrase came under increased pressure with the electoral victory of the Red Green coalition in 1998 New laws regarding immigration integration and citizenship were on the agenda with the aim of replacing the traditional ethnocultural model of German nationhood with a more liberal and modern model by moving away from the concepts of Volk and ius sanguinis The conservative CDU however accused the Schroder government of trying to jeopardize German cultural identity causing a fierce debate known as the Leitkultur Guiding culture debate On the one side of this debate there were the conservative CDU politicians who viewed Germany in ethno nationalist terms while on the other members of the Green Party and the SPD who attempted substituting the volkish tradition with a multicultural model of citizenship that guaranteed universal human rights The aim of this study is to assess which of these two models are currently prevailing in moulding immigration and integration policy Has the progressive left achieved its objective of moving away from the traditional ethnocultural and assimilationist model defining citizenship towards a more inclusive multicultural model Feminist Periodicals ,1997
