Handbook of Gender, Work and Organization Emma Jeanes, David Knights, Patricia Yancey Martin, 2012-03-02 This work of reference represents a remarkably complete detailed and extensive review of the field of gender work and organization in the second decade of the 21st century Its authors represent eight countries and many disciplines including management sociology political science and gender studies The chapters by top scholars in their areas of expertise offer both reviews and empirical findings and insights and challenges for further work The chapters are organized in five sections Histories and Philosophies Organizing Work and the Gendered Organization Embodiment Globalization and Diversity Theoretical and conceptual developments at the cutting edge of the field are explicated and illustrated by the handbook s authors Methods for conducting research into gender work and organization are reviewed and assessed as well as illustrated in the work of several chapters Efforts to produce greater gender equality in the workplace are covered in nearly every chapter in terms of past successes and failures Military organizations are presented as one of the difficult to change in regards to gender with the result that women are marginalized in practice even when official policies and goals require their full inclusion The role of the body embodiment is emphasized in several chapters with

attention both to how organizations discipline bodies and how organizational members use their bodies to gain advantage. Particular attention is paid to sexuality in and organizations including sexual harassment policies to alleviate bias and the likelihood that future work will pay more attention to the body's presence and role in work and organizations. Many chapters also address change efforts that have been employed by individuals, groups, and organizations including transnational ones such as the European Union, the United Nations, and so on. In addition to its value for teachers and students within this field, it also offers insights that would be of value to policy makers and practitioners who need to reflect on the latest thinking relating to gender at work and in organizations.

Proven Success Strategies for Women at Work, 2018. Women are underrepresented in the C suite. And women who aspire to leadership roles face unique challenges in today's companies. They are passed over for key opportunities, paid less than their male colleagues, and left out of critical networks and sponsor relationships. Additionally, smaller everyday challenges impede women's progress at work, like being interrupted in meetings, having their ideas stolen, or having to do invisible work for no credit. Being a woman at work today requires a unique set of skills and strategies. In this course, business consultants Deborah Kolb and Elizabeth Robillard help women learn these strategies so they can get the job they want, the pay they deserve, and the credit that counts. They provide guidance on how to identify challenges, negotiate for better opportunities and compensation, get helpful feedback, and create a network of support. In the course, they use scenarios of real women tackling these challenges and coming out ahead.

The Glass Wall. Sue Unerman, Kathryn Jacob, 2016-09. Bold practical strategies that will shatter the glass wall in the workplace and boost any woman's career.

Women and Work. Elizabeth Higginbotham, Mary Romero, 1997-06-12. This collection of original research articles explores how race, ethnicity, and social class have shaped the work lives of women. **Women and Work** explores women's working conditions, their wages and salaries, their abilities to control their work environments, and how they see themselves and their options in the workplace. A great deal of importance is given to women of color, non-citizens, and working-class women groups that are often neglected in other treatments of this subject. The integration of work and family, women's vision of their own work, and consciousness as employees and women's resistance to exploitative and limiting work are themes also addressed throughout this book. Written by an interdisciplinary group of women scholars, **Women and Work** will be of interest to faculty, researchers, and advanced students in the fields of sociology, organization studies, psychology, gender studies, women's history, and economics.

Women, Work, and Coping. Bonita C. Long, Sharon E. Kahn, 1993-10-25. Written by feminists and other researchers from the disciplines of psychology, sociology, anthropology, and management science, the fourteen essays in this collection are about women's experience of paid work and women's ways of coping with employment stress. The opening essays highlight the tremendous social and cultural changes that have compelled women to develop new coping strategies. Several contributing authors examine specific workplace structures and describe women's experiences in different occupational contexts, whether hostile or hospitable. Shifting from a structural to an individual perspective, other

contributors deal with psychosocial factors such as gender differences that have been found to moderate stress and enhance the coping process. They analyse individual experiences with work related stressors focusing on the mediating effects of cognitive appraisals. The concluding chapters provide a critique of research methods commonly used to study work related stress and coping and a review by the editors of the many factors and relationships which influence women's ways of coping with employment stress. *Women Work and Coping* contains contributions by Nina Colwill, Bruce E. Compas, Esther R. Greenglass, Barbara Gutek, Catherine A. Heaney, Sharon E. Kahn, Ronald C. Kessler, Karen Korabik, Bonita C. Long, Judi Marshall, Diana L. Mawson, Lisa M. McDonald, Pamela G. It offers a variety of perspectives from around the world and highlights a variety of cultural norms regarding work and family integration. *Women in Leadership and Work-Family Integration* Margaret J. Weber, 2015-09-18. The majority of university students in the US and around the world are women. Economist 2006. This recent increase in the education of women has allowed their employment rate to inflate, leading to an influx of issues surrounding the work life balance. The era surrounding World War II led to an amplified presence of women seeking opportunities for a career which in turn led to tensions at home and in the workplace as women try to balance the roles of family with a career. Many women have joined men in the provider role and the dual earner family has now become the norm. Gornick and Myers 2003. Traditional roles have shifted as women and men are both parents and workers. The picture of the career woman and mother is divided and multi faceted in existing research findings and opinions. Commonly assessed issues include the social implications of the dual roles of females, cultural norms, workplace policies with attention to female specific hurdles and marital satisfaction in gender roles. Various research studies suggest that marital relationships have become more egalitarian. Bielenski and Wagner 2004 while others find that a large number of well educated women have left careers for full time motherhood. Belkin 2003, Warner 2005. In 2009 a research group was formed at Pepperdine University.

Graduate School of Education and Psychology to explore the competing narratives of women's lives as they balance their work activities with the demands of marriage and motherhood. The ultimate goal of this project was to understand the work-life balance issues of women in the workforce. This work is now known as the Digital Women's Project (Weber, 2011) and has collected over 400 interviews of women to explore themes around work-life balance. This phenomenological analysis utilizes a narrative life course framework created by Giele (2008) to explore identity, relational style, drive, and motivation and adaptive style in order to understand the work-life balance of women. *Women in Leadership and Work-Family Integration* brings together the findings of this research group.

The Societal Unconscious Henning Salling Olesen, 2019-12-16. The Societal Unconscious presents an innovative development of theory and methodology for adult education and learning research, recognizing psychodynamic dimensions of learning processes. With few exceptions, the unconscious has been neglected in critical adult education research. The psychosocial approach in this book seeks to re-integrate the societal and the psychodynamic dimensions in analyzing adult learners and learning processes. The book responds to contemporary awareness of the societal and cultural nature of subjectivity with a new material and dialectic psychosocial theory comprising conscious as well as unconscious levels. Tracing interdisciplinary inspirations, it sets a new broad horizon for in-depth understanding of learning in everyday life. A number of empirical analyses demonstrate the entanglement of societal and psychodynamic dimensions of learning. Firstly, a part of the chapters deals with the complex subjective continuities and discontinuities in individual learning and career. Secondly, other chapters comprise analyses of leadership and the social psychology of organizational processes and the psycho-social aspects of institutional regeneration. Thirdly, the book presents outlooks into the social psychology dimensions of wider societal and political processes, including identity politics and xenophobia. A last chapter finalizes the theoretical basis of the methodology.
