Strategies Of Fantasy Hb:

Strategies of Fantasy Brian Attebery, 2008 Brian Attebery's strategy of fantasy includes not only the writer's strategies for inventing believable impossibilities but also the reader's strategies for enjoying challenging and conspiring with the text. Drawing on a number of current literary theories but avoiding most of their jargon, Attebery makes a case for fantasy as a significant movement within postmodern literature rather than as a simple exercise of nostalgia. Attebery examines recent and classic fantasies by Ursula K. Le Guin, John Crowley, J. R. R. Tolkien, Diana Wynne Jones, and Gene Wolfe among others. In both its popular and postmodern incarnations, fantastic fiction exhibits a remarkable capacity for reinventing narrative conventions. Attebery shows how plots, characters, settings, storytelling frameworks, gender divisions, and references to cultural texts such as history and science are all called into question the moment the marvelous is admitted into a story.

Contemporary Radio Programming Strategies David T. MacFarland, 2016-10-14 This book first published in 1990 offers an in-depth analysis of the fundamental beliefs of radio. This refers to the common understanding of what the radio enterprise is and should be about: entertainment and information. A major thrust of this book is to arrive at a set of fundamental beliefs about the values and the realities of the radio business in regard to entertainment programming: a set of beliefs that may or may not be right or forever but that might at least provide a basis for developing programming strategies. Most other books on radio programming describe the formats and programming that already exist. This one starts with a clean sheet of paper and the question: What do listeners really want from radio?

Treatment Strategies in Child and Adolescent Psychiatry H.B. Ferguson, J.G. Simeon, 2013-06-29 It is clear that child and adolescent psychiatric disorders impose a heavy burden of suffering. Recent large-scale community epidemiological studies suggest that as many as 20% of children and adolescents in the general population may have clinically important mental disorders. These disorders are accompanied by associated impairments in various domains of the child's life, resulting in lowered life quality for the child and his or her family. In addition, for some conditions, the onset of the disorder in childhood heralds a lifetime of serious psychosocial disturbance for a significant subgroup of affected children. For instance, about 40% of children seen in clinic settings with conduct disorder in late childhood and early adolescence will have serious psychiatric disorders in adult life. Finally, the heavy burden of suffering of these conditions is indicated by the large amounts of both human and financial resources devoted to their assessment and treatment. There is a pressing need in the field for effective treatments that are those that have been shown to do more good than harm, that will result in a significant reduction in the burden of suffering resulting from these disorders. Further, these effective interventions must be readily available and acceptable to clinicians in the settings in which children with mental disorders and their families seek care. This book addresses an important need in the treatment field.

Fantasy Brian Attebery, 2022 Fantasy has become a dominant mode of storytelling, and it mirrors our experiences and anxieties better than any representation of the merely real. This book poses two central questions about
