Strategies To Promote Self Management Of Chronic Disease

Dawn Peters-Bascombe

Strategies To Promote Self Management Of Chronic Disease:

Strategies to Promote Self Management of Chronic Disease ,1982 **Strategies to Promote Self Management of Chronic Disease** ,1982 *Promoting Self-Management of Chronic Health Conditions* Erin Martz,2017-08-15 Promoting Self Management of Chronic Health Conditions covers a range of topics related to self management theories and practice interventions that have been scientifically tested and information that individuals with specific conditions should know or be taught by healthcare professionals **Strategies to Promote Self Management of Chronic Disease** ,1982

Self-Management in Chronic Illness Jose Frantz,Laura Schopp,Anthea Rhoda,2021-04-20 Self management is a term that was used as early as the 1960s when it was applied during the rehabilitation of chronically ill children Subsequently self management was applied as formalized programs for a variety of populations and health issues In reflecting on self management it is important to note that it would be difficult for individuals not to be aware of their specific health behaviors which could include unhealthy behaviors As self management has evolved essential skills identified include behavioral modeling decision making planning social persuasion locating accessing and utilizing resources assisting individuals to form partnerships with their health care providers and taking action These are key skills that would benefit health professional educators clinicians and patients This book consisting of three parts provides insights into the aspects of self management as it relates to its definition and application It highlights how self management can be applied to various long term health conditions for different populations or target groups and in different contexts The text provides an overview of self management and the rationale for its applications by illustrating its use in specific clinical conditions and in different sub populations and target groups Academics can use the book as a textbook when teaching postgraduate and undergraduate students about self management as a technique to facilitate community reintegration for individuals living with long term conditions It can also be used by clinicians to enhance their management of individuals with long term conditions Furthermore researchers can use the text to expand and support their research in this area **Evidence-Based**

Programming for Older Adults Marcia G. Ory,Matthew Lee Smith,2015-06-17 There is increased world wide concern about the impact of multiple chronic conditions especially among the rapidly aging population Simultaneously over the past decade there has been an emergence of state wide and national initiatives to reduce the burden of chronic conditions that draw upon the translation of evidence based programs EPB into community practice Yet little has been written about the national and international implementation dissemination and sustainability of such programs This Research Topic features articles about EBPs for older adults including a range of articles that focus on the infrastructure needed to widely disseminate EBP as well as individual participant impacts on physical mental and social aspects of health and well being Using a pragmatic research perspective this Research Topic will advance knowledge that aims to enhance practice inform policy and build systems of support and delivery in regard to the reach effectiveness adoption implementation and

maintenance of evidence based interventions for older adults The focus is on knowledge transfer rather than knowledge generation but with a dual emphasis on the dissemination and sustainability of EBP that have been tested and shown effective as well as the adaptation of practice based interventions into evidence based programs This Research Topic draws upon grand scale efforts to deliver these programs and include both U S as well as international examples Commentaries discuss processes in the development and measurement of EBP and reflect perspectives from program developers and major national and regional funders of EBP as well as professionals and practitioners in the field The full length articles focus on four major programmatic areas 1 chronic disease self management programs 2 fall prevention programs 3 general wellness and physical activity programs and 4 mental health programs Additionally articles are included to discuss cross cutting issues related to building partnerships and the research infrastructure for the implementation evaluation and dissemination of evidence based programming The intent of this Research Topic is to enhance practice inform policy and build systems of support and delivery for EBP It is written for a diverse audience and contains practical implications and recommendations for introducing delivering and sustaining EBP in a multitude of settings

Self-Management of Hypertension Dawn Peters-Bascombe, 2015-09-28 Research shows that African Caribbean populations with hypertension have poorer health outcomes This exploratory and descriptive study described and analyzed self management behavior among male and female hypertensive residents of a village in St Vincent and the Grenadines SVG This qualitative study took place in Lowmans Windward village in SVG In depth semi structured interviews were conducted with a purposive snowball sample of 15 females and 15 males Most participants were poor but all had access to governmentally funded health care Non adherence to medical recommendations on physical activity and dietary intake was evidenced among all participants Over 80% of participants did not own a blood pressure

monitoring equipment Females rendered more support to their spouses than they themselves received from husbands More than 60% of participants used herbs and home remedies to control their blood pressure More males reported social support than females Results generally show that self management of hypertension behaviors among both female and male residents of SVG are not extensive and that preventive behaviors can be enhanced with adequate dietary intake daily physical activity and frequent self blood pressure Monitoring

Encyclopedia of Health Communication Teresa L. Thompson,2014-04-18 From the dynamics of interpersonal communication between health professionals and clients to global command and control during public health emergencies that cross international borders the field of health communication bridges many disciplines and involves efforts from the micro to the macro It involves navigating personal cultural and political complexities and an ability to distill complex technical science into quickly and easily understood terms for ready distribution by the mass media or to an individual patient or to the parent of an ailing child Despite an abundance of textbooks specialized monographs and academic handbooks this is the first encyclopedic reference work in this area covering the breadth of theory and research on health communication as well as their practical application Features Nearly 600 original articles are organized A to Z within a three volume set to provide comprehensive coverage of this exciting field including such topics as theories and research traditions evaluation and assessment cultural complexities high risk and special populations message design and campaigns provider patient interaction issues media issues and more All articles were specifically commissioned for this work signed and authored by key figures in the field and conclude with cross reference links and suggestions for further reading Appendices include a Resource Guide with annotated lists of classic books and articles journals associations and web sites a Glossary of specialized terms and a Chronology offering an overview and history of the field A thematic Reader s Guide groups related articles by broad topic areas as one handy search feature on the e Reference platform which also includes a comprehensive index of search terms This A to Z three volume reference is available in both print and online formats and is a must have for libraries and researchers who seek comprehensive coverage of the theory research and applications of health communication

Primary Care in Practice Oreste Capelli, 2016-05-11 The development of the Chronic Care Model CCM for the care of patients with chronic diseases has focused on the integration of taking charge of the patient and his family within primary care The major critical issues in the implementation of the CCM principles are the non application of the best practices defined by EBM guidelines the lack of care coordination and active follow up of clinical outcomes and by inadequately trained patients who are unable to manage their illnesses This book focuses on these points the value of an integrated approach to some chronic conditions the value of the care coordination across the continuum of the illness the importance of an evidence based management and the enormous value of the patients involvement in the struggle against their conditions without forgetting the essential role of the caregivers and the community when the diseases become profoundly disabling

New Ways to Care for Older People Evan Calkins, PhD, Chad Boulton, MD, MPH, Edward H. Wagner, MD, MPH, James T. Pacala, MD, MS, 2004-01-01 This book conveys the good news there is considerable evidence that practitioners themselves can design more effective systems of care for older people often at lower costs The researchers here point the way ahead evidence based interventions proactive population based care programs patient centered delivery models all developed under rigorous research controls and under the mandates of managed care The results reported here are proof that the convergence of wellness movements patient participation and managed care administration can be harnessed for improved and often more cost effective gerontologic

care *Chronic Illness* Pamala D. Larsen, Ilene Morof Lubkin, 2009 The new edition of best selling *Chronic Illness Impact and Intervention* continues to focus on the various aspects of chronic illness that influence both patients and their families Topics include the sociological psychological ethical organizational and financial factors as well as individual and system outcomes The Seventh Edition has been completely revised and updated and includes new chapters on Models of Care Culture Psychosocial Adjustment Self Care Health Promotion and Symptom Management Key Features Include Chapter Introductions Chapter Study Questions Case Studies Evidence Based Practice Boxes List of websites appropriate to each chapter Individual and System Outcomes *Health Promotion in Health Care – Vital Theories and Research* Gørill Haugan, Monica Eriksson, 2021-03-11 This open access textbook represents a vital contribution to global health education offering insights into health promotion as part of patient care for bachelor s and master s students in health care nurses occupational therapists physiotherapists radiotherapists social care workers etc as well as health care professionals and providing an overview of the field of health science and health promotion for PhD students and researchers Written by leading experts from seven countries in Europe America Africa and Asia it first discusses the theory of health promotion and vital concepts It then presents updated evidence based health promotion approaches in different populations people with chronic diseases cancer heart failure dementia mental disorders long term ICU patients elderly individuals families with newborn babies palliative care patients and examines different health promotion approaches integrated into primary care services This edited scientific anthology provides much needed knowledge translating research into guidelines for practice Today s medical approaches are highly developed however patients are human beings with a wholeness of body mind spirit As such providing high quality and effective health care requires a holistic physical psychological social spiritual model of health care is required A great number of patients both in hospitals and in primary health care suffer from the lack of a holistic oriented health approach Their condition is treated but they feel scared helpless and lonely Health promotion focuses on improving people s health in spite of illnesses Accordingly health care that supports promotes patients health by identifying their health resources will result in better patient outcomes shorter hospital stays less re hospitalization being better able to cope at home and improved well being which in turn lead to lower health care costs This scientific anthology is the first of its kind in that it connects health promotion with the salutogenic theory of health throughout the chapters the authors here expand the understanding of health promotion beyond health protection and disease prevention The book focuses on describing and explaining salutogenesis as an umbrella concept not only as the key concept of sense of coherence

A Textbook of General Practice Second Edition Patrick White, Ann Wylie, 2004-04-30 Aimed at medical students and junior doctors *A Textbook of General Practice 2e* incorporates the essential information that a student needs to know and understand about general practice and being a general practitioner The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and practice It addresses changes in the curriculum and

provides guidance on practical skills the theory of providing good medicine and the larger considerations of encouraging life long learning and professional development This is a relatively new approach in line with the GMCs recommendations and the MRCGP exams The new edition builds on the successful formula of the first by thoroughly reviewing and revising all content Self assessment sections have been added to all chapters and a glossary of terms is included at the end of the book Thinking discussion points have been extended and additional student quotes included

A Textbook of General Practice
