Mortal Friends, Best Enemies Celeste A. Wallander,2018-05-31 Several hundred thousand members of the Red Army were stationed in East Germany when that state was reunited with its western counterpart The peaceful transfer of these soldiers to their homeland produced a welcome outcome to a potentially explosive situation Through an investigation of the strategies of German and Russian decision makers Celeste A Wallander explores what conditions facilitate or hinder international cooperation in security matters Wallander spent the months and years after the fall of the Berlin Wall interviewing officials and politicians from Germany and Russia She reveals how these individuals assessed and responded to potential flashpoints the withdrawal of Russian military forces from Germany the implementation of arms control treaties the

management of ethnic and regional conflicts She also examines the two states views on the enlargement of NATO The first detailed account from both countries perspectives of the extraordinary contraction of Russian power and the implications of German unification Mortal Friends Best Enemies clearly depicts the important role European and global institutions played making the military disengagement possible Wallander draws on these findings to develop a new institutional theory of security relations In it she defines the techniques that international institutions can use to help states solve obstacles to security

Strategy and Defence Planning Colin S. Gray, 2014-06-26 Strategy and Defence Planning Meeting the Challenge of Uncertainty explores and examines why and how security communities prepare purposefully for their future defence The author explains that defence planning is the product of interplay among political process historical experience and the logic of strategy The theory of strategy best reveals both the nature and the working of defence planning Political ends strategic ways and military means all fed by reigning if not always recognized assumptions organize the subject well with a template that can serve any time place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book s title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough
